

400 Mg Deca 500mg Test | 500mg test e 400mg deca bloods | BS-Board.org

Hey legends already put a thread up but wanted to show both the blood tests I got so I'm on a cycle of test e 500mg a week and deca 400 mg a week. I got bloods done at start of week 5 about 24 hours after I pinned, total t came back at 178 estro 372. Testosterone Falsely elevated because of the deca most likely . Test and Deca cycle for beginners are simple enough to learn all the required information and understand the pros and cons of the treatments or therapies you will invest yourself in.. 400 mg: 3: 400 mg: 4: 400 mg: 5: 400 mg: 6: 500 mg: 7: 500 mg: 8: 500 mg: 9: 500 mg: 10: 200 mg .

Test and Deca Cycle for Beginners - Nexgen Pharmaceuticals

ill try to explain this again. yes deca absolutely zeros out your bodys natty test very quickly. it does not however zero out an exogenous source of test. example below.. ** natty test = 600. take a shot of 500mg deca and within weeks if not sooner natty test is, for arguments sake zero. As far as Deca-dick goes it is rare and usually occurs in Deca only cycles greater than 400mg/wk and/or cycles longer than 16 weeks. 1 Like infin_ty December 14, 2015, 5:25pm #6 In my opinion the perfect first cycle is Test E @ 500mg/week.

Test and Deca Cycle for Beginners - Nexgen Pharmaceuticals ...

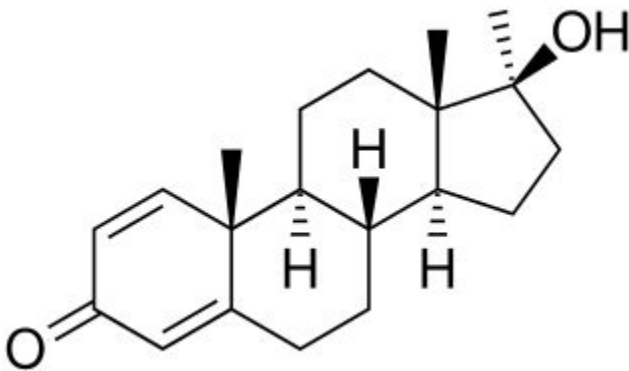

In this cycle, you are required to include Deca Durabolin (400 mg) per week with Sustanon 250 (500 mg) per week with Dianabol (30 mg) per day. You should run this cycle for 10 weeks while limiting Deca Durabolin intake to 8 weeks and Dianabol to just 5 weeks. Benefits of Stacking Deca Durabolin

Test and Deca Cycle for Beginners - Nexgen Pharmaceuticals ...

I was using Deca and test -E for 4 cycles. I had some good gains and was able to lift heavy. I switched to Trenobolone and test-E 2X a week : 400 mg. Trenobolone 500mg. Of test-E this shit is off the wall, nothing is to heavy. I've bin using this cycle now for 16 weeks.

Test is great for keeping your libido high while on Deca as well. If it helps, my first cycles were Test400 @500mg, Test Cyp @600mg, and Test Cyp @800mg, and when I ran Test400/Deca, I backed the Test down to 400 to start. Deca can really mess your system up, so make sure you are RELIGIOUS with your AI and PCT. [go to the website](#)
