

# Ginger

**Botanical Name:** *Zingiber officinale*

Our Ginger originates from both Nigeria and Cameroon, and the specific flavor profile can vary between these two origins. We work closely with our Ginger suppliers to review growing and processing methods to achieve the best quality all round for the final product. The plants are grown in complex ecosystems with many different crops, all complementing each other and making use of available resources. For example the Ginger enjoys some shade, growing well under Coconut palms. All of our suppliers are passionate about supporting farmers to develop their planting methods and work to benefit the communities that the farmers belong to.

**TASTING NOTES:** Spicy, earthy, warming and slightly citrusy
