

WHO WE ARE

ProEnclosures is a Kentucky based manufacturer with a focus on rapid prototype to production forklift enclosures, windshields, roofs, and accessories. We design, prototype, test, and produce in house to meet the model specific needs across a library of brands, and are working to expand that library daily.

**CAB
ENCLOSURES**

DOOSAN

COMFORT & SAFETY

ARE OUR TOP PRIORITIES

Our complete cab enclosures are carefully constructed to seamlessly fit the contours of the cab while accommodating accessories and lights.

Formed from hard coated polycarbonate, these kits are specifically designed to fit Doosan models. The full cab enclosure protects operators on all sides from unwanted objects or flying material entering the cab of the machine.

WHY POLYCARBONATE?

STRONGER THAN GLASS

TOUGH BUT FLEXIBLE

HIGHLY RESISTANT

Polycarbonate is flexible and lightweight while offering 250 times the strength of glass and 25 times the strength of acrylic. It is hard coated to withstand cracking or showing age over time and highly resistant to chemicals, scratches, and high temperatures- no need for too much cleaning to keep it clear.

Parts are intended to be modular for fast and easy removal and installation as usage conditions change. Can be ordered separately or as the full kit.

If you are interested in specific model fitment options, please reach out to us to learn more about our offerings.

ROOF

Keeps operators dry and protected without hindering visibility.

FRONT WINDSHIELD

Offers front facing protection from the elements and any unwanted objects.

REAR WINDSHIELD

Offers rear protection without hindering visibility or under-seat access for maintenance access.

WINDOWS

Sliding windows allow on demand airflow in the cab

DOORS

Offers visibility and protection from all sides as well as a sliding window panel, door seals, and interior handles.

No slow downs-getting in and out is a breeze with internal handles and easy-open doors.
