1. Interface of A35S

- Ⓐ AC Output port (100-240V~ 30A MAX 7000W)
- Ⓑ AC Output port (100-240V~ 30A MAX 7000W)
- Ⓒ AC Output port (200-240V~ 20A MAX 4800W)
- Ⓓ AC Output port (200-240V~ 20A MAX 4800W)
- Ⓔ Protection switch
- Ⓕ Indicator light
- Ⓖ Parallel cable

*This product is applicable to both DBS3500. The parallel function can only be used under the same power rating. DBS3500 can only be paralleled with DBS3500.

DBS3500	Ⓐ ≤ 7000W	Ⓑ ≤ 7000W
	Ⓐ + Ⓑ ≤ 7000W	Ⓐ/Ⓑ + Ⓒ + Ⓓ ≤ 7000W
	Ⓐ/Ⓑ + Ⓒ/Ⓓ ≤ 7000W	Ⓐ + Ⓑ + Ⓒ + Ⓓ ≤ 7000W

Instructions:

1. Insert the two parallel cables into the parallel ports of the two power stations.
2. DBS3500: The appliance load can be inserted into any of the A/B/C/D output ports according to their rated power. The multiple output ports can be used at the same time. The maximum output power of the output port A/B is 7000W and the maximum output power of each C/D output port is 4800W. When multiple output ports are used at the same time, the total maximum output power cannot exceed 7000W.

2. Product Illustration

You can charge the power station with solar panels and use parallel power supply at the same time while connecting with the junction box.

3. Product Information

- Model number: A35S
- Output voltage: 100V-240V, 50/60Hz
- Maximum input/output power: 7000W MAX,30A MAX
- Input voltage: 100V-120V*2, 50/60Hz
- Operating temperature: 0°C to 40°C(32°F to 104°F)
- Expandable capacity: 28140Wh Max(2*DBS3500+4*DBS53000B)

4. Operating Instructions

- Before you connect two DBS3500 power stations in parallel, please make sure that the AC switches of the two units are turned off.
- After the two DBS3500 are connected to the junction box through the attached parallel connecting cables, please turn on the AC switch of one DBS3500 (the junction box will provide 120V single output) and then turn on the AC switch of the other DBS3500 after 3 seconds (the junction box will provide 240V dual output).
- The junction box will not provide electrical output if only one DBS3500 power station is connected to the junction box.

5. Build a whole home backup system

Tip: All the plugs need to be connected accurately and fixed firmly.

6. Safety Tips

- Please ensure that this product is fitted with the connectors of DBS3500 before use;
- Please confirm the voltage range requirements of your appliance before use to prevent your appliance from burning out due to overvoltage;
- It is strictly forbidden to allow this product to come into contact with any liquid. Do not immerse this product in water or get it wet.

7. Wrong Connection

If connecting to grid power during parallel connection, the inverter will quit parallel connection and enter charging and bypass mode.

Wrong Connection will damage the battery inside the power station and your warranty will be invalid.

8. Frequently Asked Questions

- Can the DBS3500 be used normally after parallel connecting?

Yes

- Can the DABBSSON DBS53000B extra battery pack be connected to DBS3500 power station for capacity expansion after parallel connecting?

Yes

9. FCC STATEMENT

This device complies with part 15 of the Fcc Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the Fcc Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

10. Warranty

The product is covered by a limited warranty from Dabbsson for the original purchaser that covers the product from defects in workmanship and materials for 24 months from the date of purchase (damages from normal wear and tear, alteration, misuse, neglect, accident, service by anyone other than authorized service center, or act of God are not included).

During the warranty period and upon verification of defects, this product will be replaced when returned with proper proof of purchase.
