# CRUSADER AV

Classroom aids to make life easier

CRUSADER AV

In addition to providing a growing range of reliable robust classroom computer accessories, Crusader has always supplied and installed a carefully selected range of technology-based solutions.

Every year we carefully investigate new products and reject any that we feel are not value for money, where the supplier does not match our grand expectations or where the solution offered simply does not work as documented.

As a result of our careful supplier qualification, we have built a strong relationship with the leading brands of Interactive Screens and several of the market leading software-based solutions.

We have also searched to find quality products from manufacturers that have perhaps come to the market later than the leading brands. These less well-known manufacturers have lower overheads and therefore offer their products at more competitive rates than the big-name brands.

All our products are offered on a "Try before you buy" basis so that you can establish for

yourself that although the brand name may not be familiar to you the product is of the highest quality and offers exceptional "value for money" and is not just a cheap price with less functionality and support.

We can only show a small selection of the products we offer within this catalogue.

If you have a specific requirement, please call and we will offer our expert advice on what we consider to be the most effective solution at the best possible price. Before you decide, we will demonstrate our solution working and if practical, let you try it in your own environment.

Over the last 35 years we have established an enviable reputation by ensuring we offer our customers the absolute best products at the most competitive rates.

Almost Unbreakable Headphones

85dB Limited, Flexible

The World Health Organisation (WHO) and most auditory health bodies have stated that 85dB is a recommended maximum noise level for young children's hearing, as noise levels above this can permanently damage their hearing. Headphones rather than ear plugs, or earbuds are also recommended as ear plugs/buds are not limited and the noise vibrations are closer to the child's delicate working of the inner ear, and therefore loud sound can do more damage. It is also recommended that even with volume limited headphones that children are limited to two hours listening with headphones per day.

ViewBoard® IFP52-2F Series

Tap Into Limitless Learning

Android™ **EDLA** Certified

ViewSonic®
See the difference.®

Create an Interactive & Engaging Classroom

With over 30 years as an award-winning visual display leader, ViewSonic has one of the most comprehensive interactive flat panel ranges in the industry.

The easy-to-install, and easy-to-maintain ViewBoard® series is available in 55", 65", 75", 86" and 98" with blue light, anti-glare, anti-scratch 7H toughened glass.
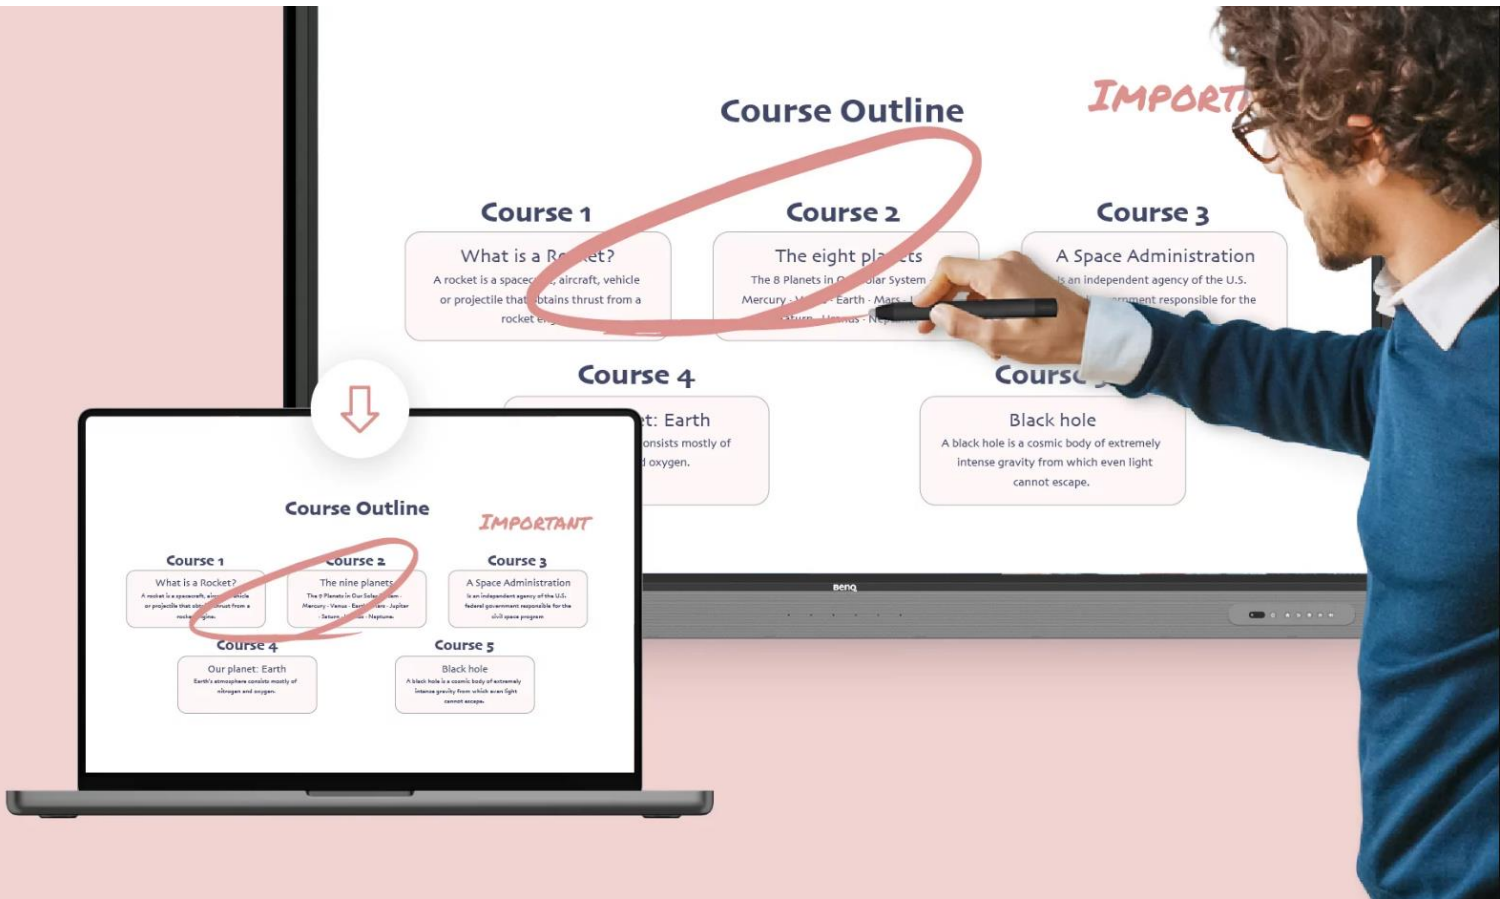

Whether you need to create dynamic lesson plans with ease, or promote a collaborative and engaging classroom environment, ViewSonic has the perfect solution to change the way you enhance education through technology.

The interactive flat panels have user-friendly interfaces, connectivity options, integrated computing, content sharing capability and the ability to upload agnostic school materials across multiple platforms.

ViewSonic has proven its dedication to improving the learning process within schools by offering two complimentary software packages, myViewBoard and ViewBoard® Cast, with every panel.

BenQ

Create an Intuitive & involved Classroom

With 3 ranges of boards to choose from, BenQ have a screen to fit your needs, be it for primary, secondary or higher education.

The easy-to-install, and easy-to-maintain. BenQ Boards come in the RP02, RM03 and RE01 series, all with anti-glare, eyecare and collaborative whiteboarding technology.

Whether you have online learning classes, or promote a collaborative and engaging classroom environment, BenQ has the perfect solution to change the way you enhance education through technology.

The interactive flat panels have user-friendly interfaces, connectivity options, integrated computing, content sharing capability and the RP02 and RM03 ranges include germ resistant screens to help keep students safe and healthy.

To help IT teams control, manage and update their devices remotely, BenQ offers a Device Management Solution. And for teachers, the BenQ Account Management system provides personalised workspaces including access to cloud files and tailored device settings.
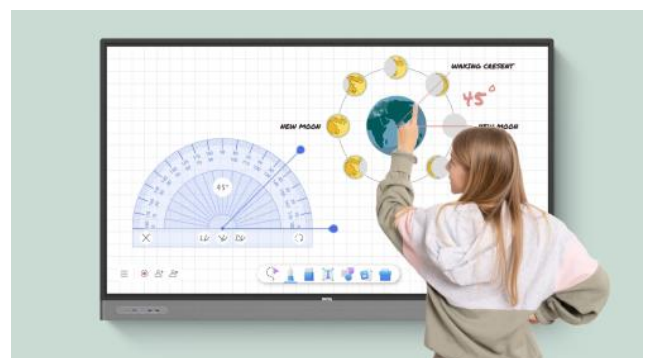

SAMSUNG

Digital Flipchart

Let's Flip! Teamwork simplified

Imagine a new era of learning.

Samsung Flip 3 transforms the classroom through interactive learning experiences, giving educators the resources needed to create effective and modern lessons. With more software and connectivity options, and intuitive interaction features, Flip 3 creates engaging learning environments.

65" and 75" Interactive E-Board from Samsung

Unlimited learning possibilities

Samsung interactive display WAC series offers a dynamic, engaging experience designed for the classroom of the future. Its enhanced usability and compatibility make it easier for teachers to leverage education apps and features that optimize lessons and help students discover the joy of learning.

Create more engaging lessons with intelligent apps

Intelligent App for class

Important apps and tools can be conveniently added to the home screen bar for easy access. Intelligent apps, such as timers and stopwatches, help teachers get creative with their lessons to foster a learning environment that students love.

LCD Video Walls
Innovation for Broader Vision
Why Choose Dahua

The Dahua LCD video wall adopts industrial anti-glare panel with high definition, high brightness, and high colour gamut. It comes in 46", 49", 55" and 65" screen options with rich video interfaces. Bezel-to-bezel width includes 0.88mm, 1.7mm, 1.74mm and 3.5mm to meet the needs of various scenarios. Our products have been widely used in command centres, monitoring centres, exhibition halls, shopping malls, cinemas, museums, conference rooms and other indoor splicing display scenarios, bringing excellent visual experience.

Basic Series

It comes in 46" and 55" models with 500 nit brightness, 3.5mm bezel-to-bezel width and simplified interfaces. It can be installed in a wide range of small-scale scenarios such as control rooms, meeting rooms, retail stores and more.

Essential Series

This series offers nearly seamless bezel design, advanced colour calibration, abundant interfaces with HDMI daisy chain and convenient installation mode. It creates endless possibilities for security monitoring and commercial display scenarios.

Ultra Series

The ultra series features high-definition panel with DP UHD daisy chain to ensure vibrant and clear contents on the video wall, whether installed horizontally or vertically.

Dahua Interactive Board Series'

Lite Series

The Lite Series are highly competitive digital whiteboards that also offers the basic AI features of the Pro Series, such as Handwriting Recognition (*only ST420). For education or business scenarios, the lite series integrates practical functions that make writing, browsing the web, operating APPs, file management, remote meetings, etc., easier than ever.

Educational Software Compatibility

Effectively assists teachers in each teaching workflow, including easy lesson preparation, interesting class organization, and timely performance assessments. It encourages students to participate fully in class activities such as games and quizzes and inspires them to explore.
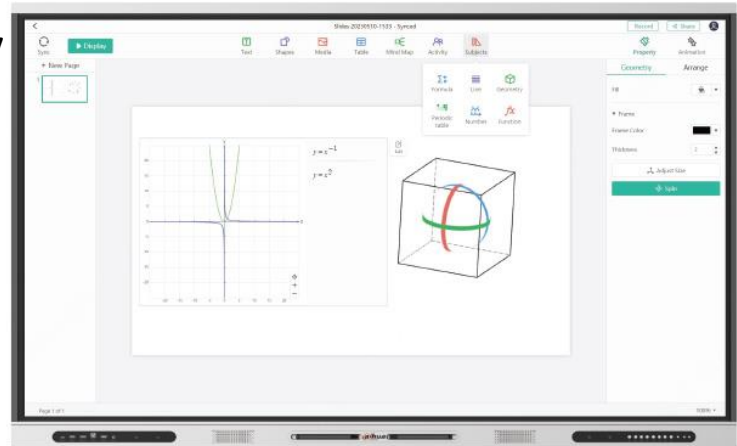

Pro Series

The Dahua DeepHub Pro Series are powerful digital whiteboards designed to meet the daily needs of collaboration in different industries. The series offers powerful AI features, including handwriting recognition and gesture control. It also supports Voice Tracking and Auto Framing for remote teaching and meeting scenarios. With its multi-core SoC, the Pro Series delivers advanced performance and efficient computing capabilities.

Powerful AI Functions

Handwriting Recognition automatically interprets intelligible handwritten texts and graphic inputs. Gestures Control allows effortless operation for teachers in any corner of the classroom. Voice Tracking and Auto Framing are suitable for various remote teaching scenarios.

ViewSonic
See the difference.

An important update on lamp-based projectors:

In the next few years, a law banning the sale of mercury-based projector lamps is going to come into force. This will undoubtedly have an impact in many schools.

Consequently, if you are looking to purchase any new projectors you should now be looking at either laser or LED based units. We would be happy to help you with that process.

In addition, you might want to look at the number of lamp-based projectors you have, particularly if you have multiples of the same unit and think about putting some lamps into stock.

We have found that the lead times for many of the older projectors are running into months not weeks.

With the above in-mind Crusader AV Offers a wide selection of LED and laser projectors.

With a range of brands to choose from, we have a projector for every space and budget.

Please contact us to find out more.

MAXHUB

MAXHUB XT SERIES FOR
MICROSOFT TEAMS ROOMS

MAXHUB | Microsoft Teams
