Step 1. Read the manual

Step 2. Install the handlebar
- Rotate the handlebar so that it's 90 degrees from the wheel and frame
- Put on the stem cover and tighten the 4 screws in order

Step 3. Install disc brakes for the front wheel
- Align the disc brake with the wheel
- Make sure all of the 6× Bolts M5*8.5 are inserted and the disc brake is tightened with the included allen wrench

Step 4. Assemble and install the front wheel
- Keep the lever open and thread on the thumb nut a couple of turns leaving enough room for the fork dropouts.
- Both cone springs should point toward the wheel hub.
- Loosen the 4 bolts on the stem to remove the stem cover
- Lower the front fork onto the front wheel. The brake rotor should go into the brake caliper in between the brake pads and the axle should enter the fork dropouts fully.

Step 5. Assemble the seat
- Open the clamp under the seat post. Pull the seat up or push it down to adjust the height

Step 6. Install the saddle
- Close the clamp to secure the seat in place. Do not raise the saddle higher than the safety line
- Loosen the 4 bolts on the stem to remove the stem cover
- Open the lever and unscrew the thumb nut from the quick release.
- Insert quick-release skewer with each cone spring on both sides into the wheel and pre-fasten thumb nut.
- When installing, the right pedal tightens clockwise (CLOCKWISE) and the left pedal tightens counterclockwise (COUNTERCLOCKWISE). The right pedal tightens clockwise (CLOCKWISE) and the left pedal tightens counterclockwise (COUNTERCLOCKWISE).

Step 7. Install the saddle
- Hold the quick release lever in line with the axle and tighten the thumb nut until the lever can stay in parallel to the floor without being held. Use the palm of your hand to close the lever fully without touching the brake pad.

Step 8. Check and adjust
- Look for the ‘R’ or ‘L’ label at the threaded end of the pedals to identify the correct side
- Completely tighten the pedals with a pedal wrench or an open-end wrench
- Hand tighten a first.

Note: Always double-check the assembly before riding.
