PRECAST CONCRETE PLUNGE POOLS

The pool solution  
for small spaces

## Plunge pools are exploding in popularity.

Swimming pools have become a “must-have” feature in your garden or backyard, especially when summer hits and you need a way to escape from the heat. But if you live in a smaller home or don’t have a particularly big garden, installing a traditional swimming pool isn’t always an option. That’s where the plunge pool comes in.

At it’s most basic level, a plunge pool is simply a highly-compact swimming pool, the perfect compromise when space at your home is at a premium.

Their smaller size allows a pool to be installed in areas a traditional pool cannot, like along the side of a smaller lot, tucked in by a wall or a fence, or even in an enclosed area of your home. Giving you all the benefits of a pool, without sacrificing space.

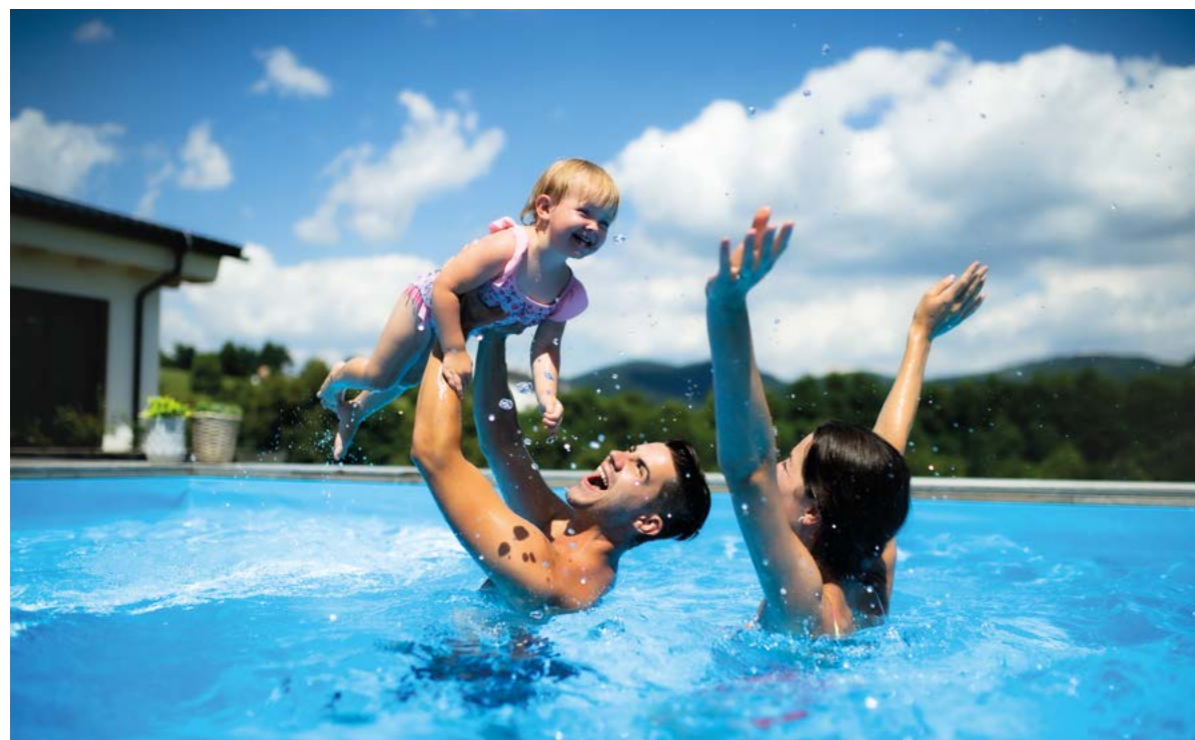

## Enjoy your pool quickly and simply.

By taking what has traditionally been a timely, and often messy, on-site construction solution and turning it into a pre-engineered off-site manufactured one, we have revolutionised the concrete pool building process.

Every **BLOC** plunge pool shell is of mono-bloc precast concrete construction, finished

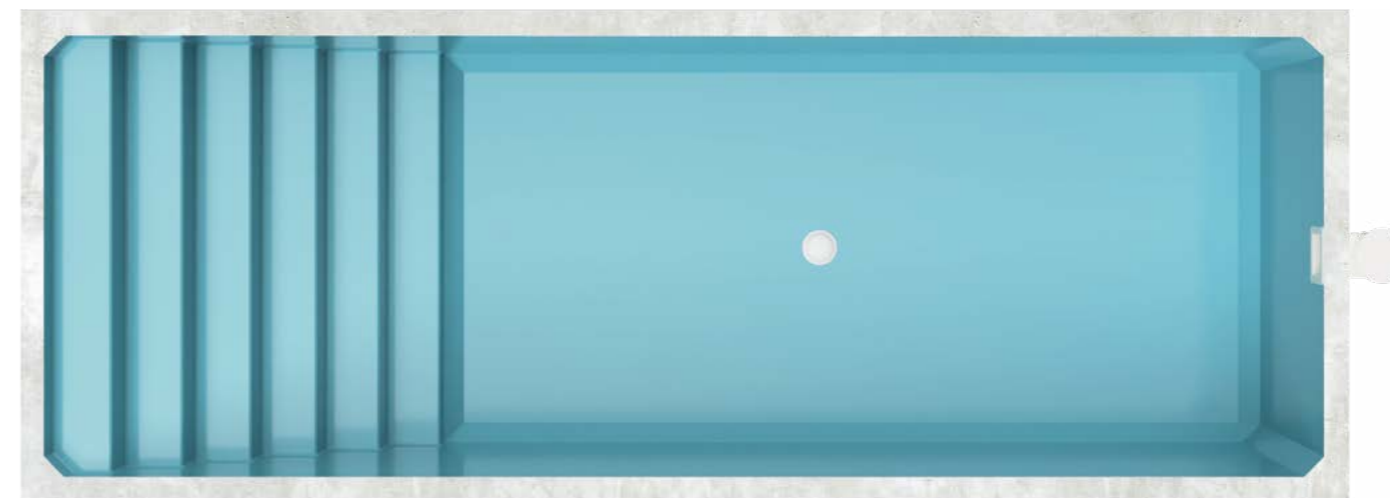

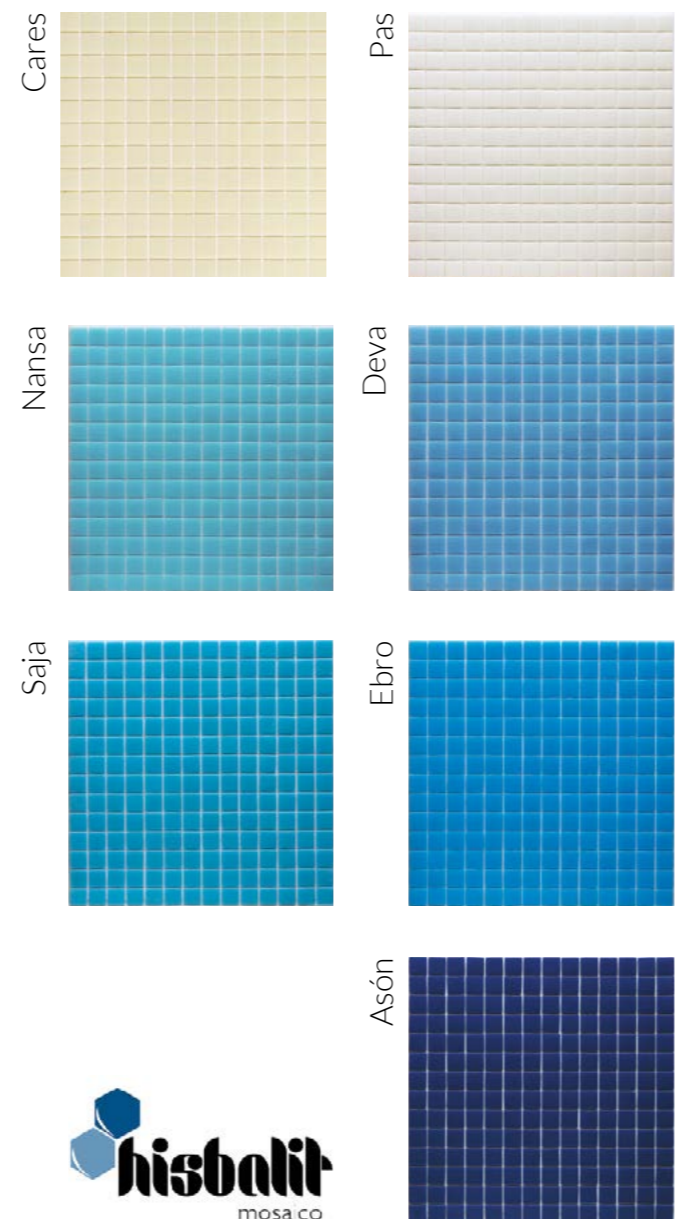

internally with high-quality glass mosaic tiles, and pre-plumbed with its primary filtration provisions (skimmer box, floor drain and return flows).

The pool is then shipped to site ready for placement in your desired location, reducing the on-site works for you and your installer.

EVERY **BLOC** POOL COMES WITH THE FOLLOWING AS STANDARD:

- REINFORCED PRE-CAST CONCRETE POOL SHELL
- A CHOICE OF PREMIUM GLASS MOSAIC TILE INTERIORS
- PRIMARY POOL FITTINGS PRE-PLUMBED TO SHELL, INCLUDING:
  - SKIMMER BOX
  - MAIN FLOOR DRAIN
  - 3 X FILTRATION RETURN FLOWS

**BLOC 6.7** is swimming pool-sized and the largest in our range. Great design and functionality; perfect for larger families or anyone looking to maximise their pool experience.

**Price: 14,500\* Euros** (supply only)
