

We have an APP for that...

Well, let's just say, we've implemented an innovative technology that mimics an app. Just another tool we can offer to quickly connect users to the sizing information and product use for our Self-Locking Tap Extension ANSI (metric) and NPT Pipe tap lines without the website clutter.

Here are some key features:

- **Home screen icon:** Easily add without the need for installation. Eliminates the endless searching through your browser or bookmarks! Whether you are on a **desktop or a mobile device**, simply follow the prompts to add our icon to your home screen. Or, you can still save the link below to favorites and same access size charts.
- **Offline Functionality:** No need to worry about internet connectivity! Users will still get fast and responsive access to our Tap Extension Size Charts even when offline, ensuring uninterrupted access to vital information.

Note: To start using simply type in or click this link [SizeCharts.TapExtension.com](https://sizecharts.TapExtension.com) and follow the prompts to add this icon to your home screen. <https://sizecharts.TapExtension.com>

- Choose the **type** of size chart ANSI (metric) or NPT Pipe,
- scroll the pdf format to find the **Tap Size** you are using,
- **confirm** the required max accepted **dimensions** for the Tap Square and Shank
- **choose** the **length (OAL)** or extra reach you need,
- note the **four digit item** number.

Tap Into More...

Once you have a match you can click over to our full website to find more product information, distributor and online purchase options.

**Great you have a
match... contact us or your
distributor for more information.**

**Always in stock! Ships same-day by 1:00pm Pacific
Time Zone.**
