Walnut 22,000

Oak 19,000

Maple 19,000

With a traditional footprint and a contemporary, minimal aesthetic, the Mandelbrot Hutch is an impressive and stately piece that will stand proudly anywhere in the home. This flagship colossus in the Mandelbrot line features clean, iconic bevels which conjoin in each corner to a distinctive, solitary point. The sharp, clean lines are soft to the touch as the bevels fall back into the piece. Every detail is scrutinized with care. The Mandelbrot Hutch has a custom open shelving layout in order to display the most important pieces with the utmost dignity. The casework, drawer boxes and shelves are constructed from solid, sustainably-sourced American hardwoods. The minimal brass pulls are made by hand in our downtown Los Angeles workshop by skilled craftsmen. The door and drawer fronts feature a custom finish that can be easily cleaned without compromising the depth of sheen; a VOC-Compliant, two-part color similar in depth and durability to an automotive finish tailored for the home. The Mandelbrot Hutch epitomizes contemporary and minimal design and will be the center of attention in any room in the home. Pictured in natural walnut, black door and drawer fronts, blackened steel base, solid brass hardware, and a hand-rubbed oil and wax finish.
