

Quick Guide & Description

Current Select: The power indicator will be on after it is plugged into the wall socket. Hold the power button for 3 seconds to enter the current select mode. While the selected amper is flashing on the display press and hold again for 3 seconds to choose the related current.

Charge Time: When the EV Charger is plugged into the vehicle the display will light up. After a short press of the power button the charging time of the vehicle will be displayed.

Over-load Protection: This will cut off the charger while the working current is over the maximum current.

Safety Information

- Do not touch the metal connector while the charger is in use.
- Do not smash or apply excessive pressure to any of the components.
- It is normal to hear a slight hum while the charger is in use.

Technical Specifications

Rated Current: Default 32A
(10A, 16A, 20A, 24A, 32A)

Rated Voltage: 250V AC

Insulation Resistance: 5M Ω DC500V

Contact Impedance: 0.5M Ω Max

Housing Protection: IP66

Portable EV Charger T2 (CEE Plug 32A)

General Info

Product Name: Portable EV Charger

Product Description: Portable EV
Charger (10A, 16A, 20A, 24A, 32A)

Included Parts: Charging Gun, Electric
Vehicle Charge Control Box, Charge Cable,
CEE Plug, and Carry Bag.

Charging Gun

Charging Controller

Switch Functions

Display

Green Light 1
Green Light 2
Green Light 3
Red Light

Control Box Functions

Leakage Protection
Low/Over Voltage Protection
Overload Protection
Lightning Protection
Overheating Protection

Operating Instructions

1 - Plug adapter
into socket.

2 - Press Switch
and Select Correct
Charging Current.

3 - Attach Charging
Gun to Vehicle
Charging Port.

4 - Remove Gun
from the Vehicle
once Fully Charged.

WARNING ⚠

Do not use in wet or explosive environments
Do not touch the metal connector on high currents
Do not use with non-compatible electric vehicles
