

# Mini portable fan

With sprayer and night light function

## Instruction manual

Question? Contact our professional customer support at mail@handfan.com

### HandFan Flash facial mist fan

Thank you for choosing our products.  
Please read this instruction manual carefully before use.

#### Hand Fan's safty assurance and special design

1. Safety Design For Battery : Use PTC (Positive Temperature Coefficient) and CID (current interrupt device), To make battery explosion impossible.
2. Safety Design For PCB Protection : Use individual charging protection circuit, protect from over-charged, over-discharged , over-current and short circuit. Assure service life and safety.
3. Safety Design For Input and Charging : Use individual management integrated circuits and constant-current charging Design, assure safety and anti-explosion, extend battery life .
4. Safety Design For Output : Use fixed frequency DC-DC to protect motor from being damaged and assure service life.
5. Through the individual IC step-up management, in the absence of batteries through USB connection charger, computer, mobile power can also be used as usual.
6. The unique design of low current and high speed motor, Service time is much

#### Packing List

Fan, USB Cable, Instruction Manual, Pinch Cock, Water Bottle

#### Product parameters

Name of the product	HandFan flash facial mist fan
Model Name	HF318
Speed Mode	3 Shift
Output power(MAX)	4W
Input	DC 5V/1A
Battery Specification	Li-ion 18650-3.7V 2000mAh
Tank Volume	20ml
Spray Volume	0.8ml/min
Working Time(h)	Hi Speed 2.5h~Low Speed 9.5h
Charge Time(h)	3~4h
Size	220 x 105.5 x 40mm
Weight	186g

#### Instructions

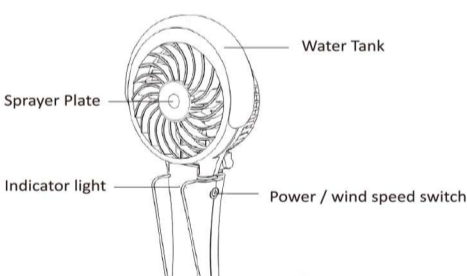

1. When charging, please use DC 5V adapter to charge this product.
2. Support charging and discharging at the same time.
3. atomization and humidification function automatically shuts off for 10 minutes, need to use to re-open the water tank in the case of no water Next, you need to manually turn off the spray, beware of dry burning.
4. Simultaneous use of air blow and spray function, may be affected by wind;
5. The water injection is completed. When the rubber plug is installed, it will be affected by the air pressure. The spray port may seep slightly. Wipe dry, it is recommended not to overfill the water;
6. Before the fan is installed in the bag, please make sure that the water tank is free from water, so as to avoid backlog of the silicone stopper.
7. Not recommended using purified water and filtering water, Easily stagnant water.
8. Under the influence of air pressure, the spray may cause a pause. this is normal. Please shake the fan.

First press power button	low wind speed
Second press power button	middle wind speed
Third press power button	high wind speed
Forth press power button	power off
Long press to open power switch	turn on the facial spritzer
Long press to open power switch again	turn off the facial spritzer
Double click to open power switch	turn on the lantern
Double click to open power switch again	turn off the lantern

#### Indicator status description

	"●" Light ON	"○" Light OFF
Charging Indicate	●○	Red falshing in charging
	●●	On blue full charged
Working Light	○●	Fan working is orange
	○●	Spraying working is green

#### Structure Description

#### Pinch Cock Assembling Method

#### Water spray method

#### NOTE

1. Don't put fingers into the fan.
2. The lithium battery is without memory function. Charge whenever you want. Maintain power is beneficial for extending battery life.
3. If the fan is not used for long time, please fully charge the battery and remove it from the fan, store in cool and dry place.
4. Fan blades will be at high-speed rotation while working. Don't put anything into the fan, otherwise, it may be serious damaged.
5. Don't use battery when the surrounding temperature is over 60 degrees centigrade. Don't pinch or disassemble the battery. Otherwise, it will lead to environmental pollution or explosion.
6. To ensure the performance and service life of the product, please use our company specified accessories.
