

KINETIX R230 is a solvent free, liquid epoxy resin formulated as a multi-purpose, room temperature cure system suitable for marine and industrial applications.

The R230 system is offered with a choice of three hardeners to provide a variety of pot-life and working times. The common mixing ratio also enables the hardeners to be blended.

This system is suitable for general purpose laminating, and can also be modified with appropriate fillers for bonding, filleting and fairing applications.

MIX RATIO

25 parts H230 hardener to 100 parts resin by weight
 25 parts H231 hardener to 100 parts resin by weight
 25 parts H232 hardener to 100 parts resin by weight

Note: Care should be taken when dispensing and mixing. Do not attempt to control the cure time by altering the hardener ratio. Contact ATL Composites for specific information.

UNCURED PROPERTIES

STORAGE

KINETIX R230 and associated hardeners will keep for 2 years if kept in original containers at room temperature (15°C to 32°C), and out of direct sunlight. Containers should be tightly sealed to prevent moisture absorption.

HEALTH & SAFETY

KINETIX R230 and associated hardeners have moderate sensitising potential, and should be kept out of the eyes and off the skin.

- Use with good ventilation and adequate safety equipment including impervious gloves and safety glasses.
- If skin contact occurs, remove contaminated clothing immediately, and wash the affected area thoroughly with ATL's 845 hand cleaner and water, avoiding the use of solvents except in the case of massive contamination.
- If eye contact occurs, immediately flush with running water for at least 15 (fifteen) minutes and seek medical advice.
- If swallowed:
Resins - DO NOT induce vomiting, and contact a doctor or the Poisons Information Centre.
Hardeners - DO NOT induce vomiting, give plenty of milk or water and contact a doctor or the Poisons Information Centre.
