UPCOMING

BIOMES OF NILGIRIS

DESIGNED BY SHELLY SINHA & SIDHANT CHAND

Biomes of Nilgiris is an enthralling board game where players venture into India's surreal Nilgiri biosphere, teeming with unique flora and fauna. As conservationists—ecologists, photographers, and citizen scientists—they aim to discover new species, address ecological issues, complete conservation missions, and earn Ecology Points. Players collaboratively adapt to two ever-changing scenarios in each game, introducing fresh concepts and objectives. As specialists, they explore the vast reaches of Nilgiris, journal field entries, gain experience at the station, equip themselves with tools, conserve species in their habitat, and skillfully resolve ecological challenges. An immersive experience celebrating nature's wonders and the art of conservation
