FASTENERS

The beauty of our fasteners lies in their functionality and discreet elegance. Made of steel and layered with corrosion resistant Ruspert® coating, our durable fasteners are designed to seamlessly blend into projects and last for years.

The self-countersinking properties of our deck screws allow them to flawlessly integrate into a variety of projects including deck and stair railings, fence projects, and so much more. Ultimately, the features of our deck screws allow them to discreetly complement any exterior wood-to-wood project, prevent staining and rusting, and ensure that your project safely lasts for years.

DECK SCREWS

Designed for decking and any exterior wood project where wood-to-wood fastening is required. The brown Ruspert® coating is a high-grade protective coating applied to metals to prevent environmental corrosion. It also allows your fasteners to blend into your wood projects for a seamless finish.

FASTENERS

The beauty of our fasteners lies in their functionality and discreet elegance. Made of steel and layered with corrosion resistant Ruspert® coating, our durable fasteners are designed to seamlessly blend into projects and last for years.

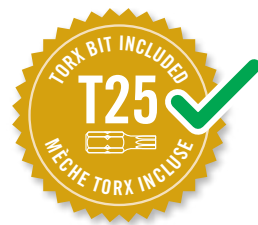

The self-countersinking properties of our deck screws allow them to flawlessly integrate into a variety of projects including deck and stair railings, fence projects, and so much more. Ultimately, the features of our deck screws allow them to discreetly complement any exterior wood-to-wood project, prevent staining and rusting, and ensure that your project safely lasts for years.

UNDERSTANDING POST CAP SIZES:

When a post cap fits a nominal or dressed post, the post is actually measuring 1/2" less.

Example: A nominal or dressed 4" x 4" post cap fits a post that actually measures 3 1/2" x 3 1/2"

When a post cap fits a rough lumber or undressed post, the post size is that actual measurement.

Example: A 4" x 4" rough lumber or undressed post cap fits a post that actually measures 4" x 4"

PRO GATE FRAMES

The versatile design of our gate frame is the perfect way to elevate any backyard entrance. Use with the arch for a classic look, or without the arch for a modern frame. Its tough, galvanized steel construction makes it as long lasting as it is good looking.

GATE FRAME BRACE KITS

Reduce the sagging and dragging of unsupported wooden gates with our high-quality gate kits. Designed with functionality in mind, strong square cornered frame braces create durable gates that'll look great for years.

Board material versatility gives you the freedom to choose what works best for you.

Insert dimensional fence board lumber that is 5 1/2" wide. Cedar or vinyl may need to be trimmed to size (boards purchased separately).

Additional style: Use without the arch for a clean and simple rectangular gate frame.

Made of galvanized steel, our gate frame brace kits will keep your gate functional and long lasting for years to come.

Compatible with inward, outward left or right gate configurations, these gate brace kits include everything you need for installation and are perfect for any outdoor space.
