

What **deck dreams** are made of.

The TruNorth Decking Advantage

Our shared commitment

We know that preserving our environment's health is just as important to you as it is to us, which is why we have proudly developed a product that is comprised of 95% recycled material and established a production process that has reduced our oil consumption and greenhouse gas emissions.

With our rice hull composite decking, every 10 ft. x 16 ft. sized deck recovers 6,000 plastic water bottles from the landfill. Together, let's leave the trees in the forest.

With TruNorth® Decking, your personal outdoor oasis is within reach. Relax somewhere inspired by your unique vision and TruNorth's patented, environmentally responsible, and North American made composite decking.

Exceptional By Design

Located in Brantford, Ontario, our 40+ years of experience and technical expertise in the recycled plastic industry has proudly made us the only Canadian manufacturer of composites.

This experience has led us to our proprietary rice hull capped product which is superior for durability and performance in the decking industry.

At TruNorth® Decking, we want every customer to feel excited and confident from the day they order their new decking to every day they step outside.

Since our entire manufacturing process is computer controlled and monitored, we know that every board we produce is produced to the highest quality standard possible.

All of our product certifications are completed by an independent third party company, including the global leader, Intertek. We oversee and control production so that the shipment we send you is completed on time and with perfection. And with our 25-year product warranty, you can depend on your deck looking great year after year.

Dreams turned into reality.

To guarantee our remarkable decks, our products are tested in our industry leading quality assurance and product testing labs at both the recycling input and final extrusion stages. With TruNorth's advanced rice hull composite, you aren't simply recycling, you are investing in a long lasting deck designed and built to save time, money, and the environment. What you get with TruNorth Decking:

Long lasting good looks - Wood grain appearance that won't fade or stain

Lower lifetime ownership cost (start seeing payback in as little as 2 years)

Ultra low maintenance (no painting, staining or sealing)

No splinters, revealing nails or screws

TRUNORTH ACCUSPAN

With design and simple installation in mind, building your dream deck has never been easier. TruNorth® Accuspan composite deck boards feature a dual-embossed grain and come in both grooved and square edge to provide complete flexibility in your design.

The grooved edge Accuspan deck boards are compatible with hidden Slide & Go® fasteners for main deck surfaces. The square edge Accuspan deck boards are perfect for using on trim, stair treads, feature boards, and picture framing patterns. They are also the decking you want for direct fastening on main surfaces.

Both decking profiles are certified to meet Canadian, International and USA building codes and feature our best 25-year warranty for stain and fade so that your deck stays beautiful longer.

TruNorth® Accuspan grooved edge deck boards are 5 1/8" x 1" and available in 12', 16' and 20' lengths.

TruNorth® Accuspan square edge deck boards are 5 1/8" x 1" and available in 16' and 20' lengths.

Twelve beautiful shades to choose from.

TruNorth® Accuspan grooved edge and square edge deck boards are both available in six bold and modern solid colours as well as six variegated hues. A full suite of complementary square edge and fascia boards in matching colours are also available.

TRUNORTH ENVIROBOARD

If you're looking for a fresh deck and also looking to stick to a strict budget, Enviroboard decking is your best option. With the same superior quality, durability and wood grain features, TruNorth® Enviroboard is our most economical selection available.

Featuring a lighter weight profile than Accuspan, Enviroboard uses less material without giving you less quality. Just because this is our most affordable option doesn't mean you sacrifice on value. In fact, we use the exact same formula and capping as our Accuspan decking, and TruNorth Enviroboard is backed by the same 25-year stain and fade warranty.

Just like our Accuspan product line, TruNorth Enviroboard grooved decking is compatible with Slide & Go® hidden fasteners for quick installation and certifications that meet International and USA building codes.

TruNorth® Enviroboard grooved edge boards are 5 1/8" x 1" and available in 12', 16' and 20' lengths.

Complementary TruNorth® Accuspan square edge deck boards in matching colours are 5 1/8" x 1" and available in 16' and 20' lengths.

TRUNORTH Enviroboard comes in the same palette of nuanced hues as our Accuspan line.

TruNorth® Enviroboard grooved edge deck boards are available in six bold and modern solid colours as well as six variegated hardwood hues. A full suite of complementary square edge and fascia boards in matching colours are available in the TruNorth Accuspan product line.

Accessories

To masterfully finish your deck, we provide a complete line of accessories to trim and complete any type of installation and design. Available in all 12 colours. Our Slide & Go® fastening clip system allows for easy installation and these great benefits:

- No visible screws
- Reinforced plastic that never rusts
- Single boards can be removed, flipped and adjusted if needed
- Made to exactly fit our boards (not a universal clip that fits "just okay")

Fascia installation is easy. Just pre-drill with the fascia tool and then drive the fascia screw, leaving space for expansion and contraction.

Slide & Go® Fastening Clips

Colour Matched Starborn Pro Plug® System

12' Fascia Board

Complementary fascia boards in matching colours are 5/8" x 7 1/2" x 12'.

Slide & Go® Fence

TruNorth Slide & Go® Fence is a horizontal fencing system that was specifically designed to provide:

- The strength and endurance of aluminum
- The durability & low-maintenance of composite
- The warmth and privacy of a natural wood fence

We combine 3" square aluminum fence posts and two custom-designed, left and right aluminum "U" channels with our Enviroboard. The 9'4" long posts are set in concrete just like a wood fence post. Then we slide these easily down the channels which are attached to the aluminum fence posts. The finished result is a residential yard fence that has virtually no maintenance, and a framework that will not warp, crack, lean, or rot.

- 14 Enviroboards stacked together are required to create a 6' tall fence panel
- Horizontal Slide & Go® fencing can be built in sections up to 6' wide
- The boards are available in 12' lengths and, as such, can be cut to the exact length required after the posts are set
- Self tapping and board screws are included with the post and U-channel sets
- A horizontal cap rail can be added to the top or bottom of the panel for a clean, finished look

The **strength** of aluminum and the **warmth** and look of wood.

How does the competition stack up?

VINYL PANELS

- Susceptible to algae, mold and mildew
- Cold weather can make vinyl fence brittle and more prone to damage
- Requires frequent cleaning to remove stains & mildew
- Susceptible to fading
- Look of vinyl is not as aesthetically pleasing

SLIDE & GO® PANELS

- Will not rot or mold
- Exceptionally durable and built to withstand extreme weather
- Colour does not fade
- Eco-friendly rice husk formula made with 95% recycled materials
- Wood grain finish for the natural look of wood, without the maintenance

Authentic and **natural-looking** colours.

TruNorth® Enviroboards come in 12 authentic and natural looking colours. TruNorth Decking is also available in the same colours to complement our Slide & Go® fence.

ALUMINUM POST AND CAP KIT 9', 10', or 12'

Powder coated black aluminum post and cap kit for outdoor use in all climates. The Slide & Go® aluminum post and cap kit combined with the channel kit, cap rail or gate kit provides a strong and long lasting framework for your fence. Simply tap the 3" x 3" aluminum post cap onto the top of the post with a rubber mallet.

POST WITH BASE PLATE 3" x 3" x 6'4"

Square aluminum post with base plate and post cap included. Accommodates a 6' high fence built on top of decking or concrete. 6" x 6" x 1/4" thick aluminum plate with 4" anchor holes welded to the bottom of this post.

ALUMINUM CAP RAIL 84" x 1.5" x 1.5"

For added appeal just attach the Slide & Go® cap rail to the top or bottom of the panel for a clean, finished look. Fits snugly on the top or bottom of the panel. The cap rail can be cut to the exact width of the fence panel.

ALUMINUM CHANNELS for 6', 7' or 8' fence

These are the channels that get attached to the Slide & Go® aluminum posts to slide the TruNorth Enviroboards down into. The channels come in pairs and include self-drilling screws and wood screws. Powder coated for outdoor use in all climates.

SLIDE & GO® GATE KIT Make a gate in minutes!

- Includes: 2 hinges, latch, L-brackets, all hardware, and decorative straps
- Up to 60" wide
- Won't sag
- Just add TruNorth Enviroboards

Fencing **simplified.**

Why TruNorth Decking?

You want the best, and we deliver the best. TruNorth® is the only company that offers wood and wood filler-free capped rice hull composite decking. Our rice hull fiber composite is proven to resist water penetration which means your beautiful deck will not mold, rot, or swell. Since we encapsulate both sides, you have the comfort of knowing you can flip the boards over in the future if you damage them. Our goal is to keep your outdoor escape looking great while being enjoyed by the whole family. Our proprietary capping helps keep

your family safe from slips and splinters, prevent spilled liquids from leaving a permanent stain, reduces heat retention and minimizes fading from harsh weather.

We want to make sure that when you enjoy your deck outdoors, you also enjoy nature's beauty. For this reason, we hold ourselves to the highest standard to reduce our use of natural resources, like oil, and produce less greenhouse gases. We are proud to produce a sustainable product that uses 95% recycled materials.

- Fade and stain resistant with 25-Year Limited Warranty
- Never paint, stain or seal
- More durable than other composite boards*
- Heat blocking technology keeps deck cooler
- Rice husk formula means no rotting or molding
- Eco friendly product made with 95% recycled materials
- Reversible boards with capping on all four sides

*Based on independent lab tests for abrasion and impact resistance

Outdoor living refined: Clubhouse Decking

When you set out to make the industry's most remarkable outdoor living space, there's only one place to find inspiration: the outdoors. By looking at colours and textures found in nature, and combining that with our passion for innovation and technology, Clubhouse® from TruNorth® Decking has been able to create decking that has the look of real wood, but none of the problems that come with it.

Keep your outdoor escape looking great.

- Advanced colour technology for longer-lasting good looks
- Engineered for strength with exclusive Korelite™ technology
- Proprietary wood grain embossing technology
- Stays up to 30% cooler than other competing PVC brands
- Extreme impact resistance rivals strength of hardwoods
- Can be heated and bent without compromising
- Low moisture absorption
- Limited transferable Lifetime Performance Warranty

TruNorth in Stone Grey

Clubhouse in Brookstone

Incredible choice comes with incredible beauty.

There's a secret why Clubhouse® Decking shows so well at parties, get-togethers, and as an icon of neighbourhood envy. It's in the way our deep, rich colour is infused into each timber and the exclusive random graining process we created to mimic nature in its organic genius.

Clubhouse Decking is backed by a limited, transferable lifetime warranty and a 25-year fade and stain warranty for unprecedented peace of mind and unsurpassed assurance of beauty, year after year.

Clubhouse Decking is available in a colour palette of variegated hardwoods and contemporary solid hues. Our Hardwood colour collection was designed with a variation in colour and patterns to allow for the most realistic replication of true hardwood decking.

With six colours to choose from, the distinctive, variegated grains of our hardwood colours give you a truly unique, natural wood feel that's all your own. The Earthtone colour collection offers four stylish solid shades that offer the look of painted wood without the need for maintenance... a light cleaning is all that is needed.

*Clubhouse's dual-colour, dual-embossed boards enable **multiple designs from the same board.***

Clubhouse in Cobblestone and Ironwood

Clubhouse in Walnut

Entertain in **luxury.** **Escape** in supreme **comfort.**

Clubhouse® Decking showcases nature in a dramatic departure from ordinary planks and drab details. Clubhouse is the first of a new generation of PVC decking that incorporates advanced material science, world-class engineering, and patented performance manufacturing to produce a deck that is stunning in every kind of weather.

And Clubhouse is protected by an ingenious capstock technology that's blended into a single-extrusion process for a stunning low-gloss, natural matte finish that resists oxidation, clouding, fading and staining far beyond outmoded composite or plain PVC decking.

Clubhouse in Walnut and Ipe

Clubhouse in Ironwood

Innovation at work. Genius at play.

Clubhouse® Decking has no wood or wood fillers to warp, rot or break down. But it does have a proprietary formulation that produces a super-dense structure that is impervious to water and provides dramatic strength and protection against impact.

In our single-extrusion process, our PVC core and proprietary blend capstock become one. Both the cap and the core are made of like material, creating a stronger chemical bond during extrusion for incredible results and superior strength.

In addition, the dense cell structure allows Clubhouse decking to be heated and bent without bubbling up and compromising the wood grain texture that makes Clubhouse decking so eye-catching.

In other words, with Clubhouse decking, you get beautiful, unique shapes that real wood just can't offer. And we're so confident in our product's bendability, we actually warrant it even after it's been bent.

Clubhouse® grooved and square edge deck boards are 1" x 5 1/2" and available in 12', 16' and 20' lengths.

World-Class Materials Science. Performance Defined.

Clubhouse® Decking is made with advanced colour technology that has been field tested and proven for more than 30 years to stand up to the harsh effects of UV, rain and humidity.

Clubhouse PVC decking is made with Korelite™, our exclusive, proprietary technology that provides a dense cell structure for superior strength underfoot. Leveraging world-class, in-house materials, tooling, and manufacturing capabilities, Clubhouse is engineered with a higher density top and bottom - just like an I-beam. The 4-sided high-performance capstock and foam interior act like a stress skin panel providing unprecedented protection to the boards and your deck.

Clubhouse in Ipe, Mahogany and Walnut

Unprecedented protection against the damaging effects of UV light, harsh weather, and extreme temperatures.

CLUBHOUSE ULTRA

Show your smarts in a deck that will outperform and outlast without losing its beautiful, natural good looks. Clubhouse® Ultra deck boards are 1" x 5 1/2" and are available in 12', 16', and 20' lengths in both grooved and square edge.

Complementary fascia boards are also available in matching colours. And with a Class A Flame Spread Index, you'll have peace of mind knowing that your Clubhouse Ultra deck is protecting both you and your family as well as the planet.

HARDWOOD COLLECTION

Clubhouse® Ultra decking has undergone rigorous testing to be certified with a Class A Flame Spread Index and is able to withstand fire for longer than any of the other classifications.

Clubhouse® Accessories

When you install high-quality PVC decking, you need a smart fastening system to show off the finished surface. Clubhouse® offers an easy-to-install complete hidden fastening solution that's engineered to work.

The ingenious Clubhouse fastening system is a hidden secret designed to show off the beauty and elegant lines of premium Clubhouse Decking without any visible means of support.

Clubhouse ConnectClip™

With the Clubhouse ConnectClip™ system you get a fastener that goes down fast and leaves the deck surface unmarred.

- Ideal for main decking areas
- Two packaging options:
 - 50 sq. ft. of individual hand driven screws
 - 300 sq. ft. of collated pneumatic scrails, for use with Tiger Claw pneumatic installation gun

Cortex® Hidden Fasteners

Perfect for stairs, perimeter boards and hard to reach areas, Cortex® plugs blend seamlessly.

- Made from colour matched Clubhouse stock
- Available in all 10 Clubhouse decking colours
- 100 lineal foot package

12' Fascia Board

Complementary fascia boards in matching colours are 1/2" x 12" x 12'.

Mahogany

Clubhouse Dexerdry® Weather-diverting System

Our patented system creates a dry zone by preventing water and the elements from penetrating your deck surface.

- Easy to install
- Easy to maintain
- Cost-effective
- Made in USA with recycled materials

Details that make all the difference.

The Clubhouse fastening system includes the Clubhouse ConnectClip™ to leave deck surfaces completely unmarred and the seamless Clubhouse Cortex® plug for perimeter areas and stairs. In addition, the Clubhouse® Biscuit Hidden Fastener option acts like a tongue, simultaneously spacing the deck boards and holding them down.
