## • MODULES •

To install and connect our CarPlay/Android Auto Module to your Mercedes car stereo, follow these steps:

1. Install the module into the glove box cradle.
2. Turn on your car stereo and go to the telephone Bluetooth settings.
3. Connect the module to your car stereo as a Bluetooth telephone within the Mercedes system. You may need to authorize the connection without a passcode. (to do this find the module in your bluetooth list, navigate onto the name, then use the command knob to scroll right onto the square box with three lines inside, click then select authorize)
4. Set your audio source to Bluetooth audio.
5. Press the navi button to enter the module's menu.
6. Find and select the Bluetooth icon in the module's menu to initiate a connection between your mobile phone and the module.
7. Once your phone is connected to the module, you can use CarPlay or Android Auto to play music and make phone calls through your car stereo.

By following these simple steps, you can install and connect our module to your Mercedes car stereo and enjoy hands-free phone calls, navigation apps, music streaming, and much more via CarPlay and Android Auto.
