NTG 5.0 Decoder CarPlay and Android Auto Instructions

K-TECH

****Stage 1: Prepare CarPlay Module****

1. Set the dip switches on the CarPlay Module according to the included instructions.

****Stage 2: Prepare the Stereo****

2. Remove the dash trims to access the stereo removal screws.
3. Loosen and remove the stereo screws.
4. Take out the stereo unit.
5. Disconnect the ISO block from the rear of the stereo.

****Stage 3: Cable and Block Transfer****

6. If you have an Orange Optical Cable, transfer it from the Mercedes ISO block to the new ISO block's position.
7. Attach the new ISO block to the stereo and connect the Mercedes ISO block to the male ISO block connector on the new loom.
8. Thread the loom down behind the heater controls/to the back of the stereo void.

****Stage 4: LVDS Cable and Decoder Placement****

9. Remove the LVDS cable from the stereo and connect the new LVDS splitter cable to the stereo, plugging the screen cable into the new LVDS loom. Run this down behind the heater panel/the back of the stereo void.
10. Position the Decoder behind the stereo in the void or in the heater matrix void. In some models, it may need to be installed behind the glovebox void.

****Stage 5: Connect Decoder****

11. Plug in the LVDS and ISO harness into the CarPlay decoder.
12. Install the USB loom and WiFi antenna into the decoder.
13. Insert the 3.5mm jack into the decoder harness and route it to either the 3.5mm input in your car or the media input in the center console, using the supplied adapter.

****Stage 6: Reassemble Stereo****

14. Reinstall the stereo unit loosely.
15. Power on your stereo, set the audio source to Aux or media interface, and hold down the return button next to the command knob. Follow the provided instructions to connect your phone. Ensure the system functions and you have audio.

****Stage 7: Final Assembly****

16. Once the system is confirmed to work, secure the stereo back in position.
17. Put the dash back together.

****Stage 8: Configure Bluetooth Calls****

18. To use the Mercedes mic and speakers for Bluetooth calls, open MB Bluetooth on your phone. Set the device type to Headphones and adjust the call audio routing in your settings to Bluetooth headset for the best call quality.

Enjoy your upgraded Mercedes experience!

Benz NTG5 Box Wiring Diagram

Connect to quadlock cable removed from radio

Connect to quadlock in radio (if there is optical cable in original plug, move it to same spot in new plug)
