

QUICK GUIDE

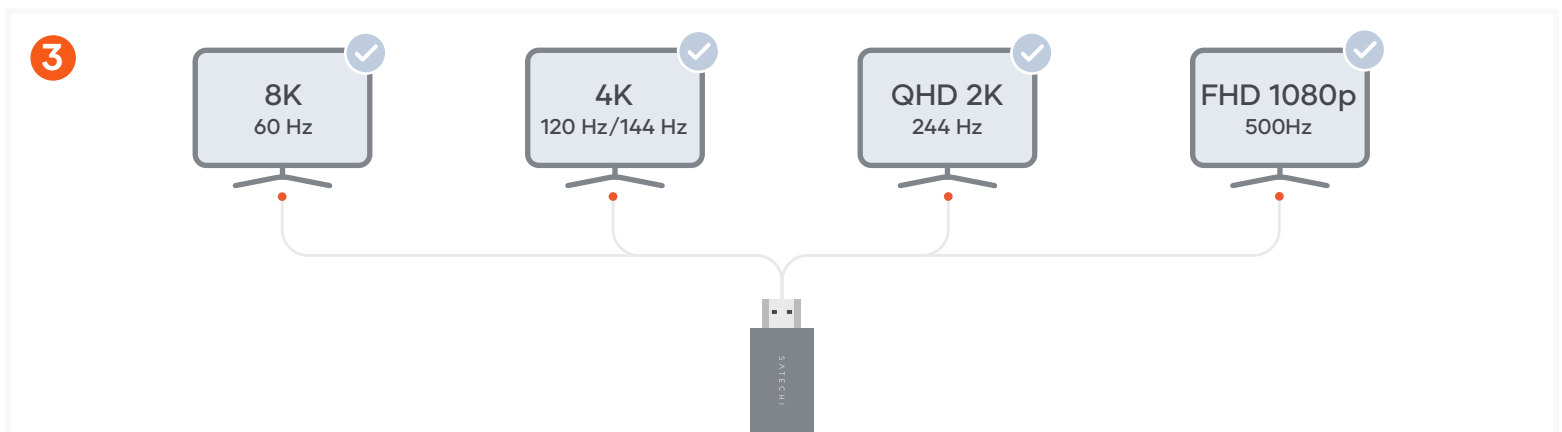

USB-C TO HDMI 2.1 8K CABLE

Connect USB-C to HDMI 2.1 8K cable into a compatible external display, monitor or television with available HDMI port. The Adapter is backwards compatible with HDMI 1.4 and up.

Connect USB-C to HDMI 2.1 8K Cable to your compatible host device. USB-C connector must be connected to host device and not USB-C external monitor.

Cable supports the following outputs: 8K @ 60Hz, 4K @ 120Hz/144Hz, QHD 2K @ 244Hz, FHD 1080p @ 500Hz. Host device must support DP ALT Mode over USB-C.

Attention:

- Resolution and refresh rate depend on the host device and external display capabilities
- 8K video resolution **not supported** on macOS, iPadOS, or iOS
- On 8K TVs, settings may need to be adjusted to achieve 8K video resolution. Please check your television user manual for guidance on how to enable 8K resolution.
