HOW TO
TAKE CARE
OF YOUR
CANDLE

THE PARTYLITE MISSION

TRANSFORMING PEOPLE'S LIVES THROUGH THE POWER OF FRAGRANCE

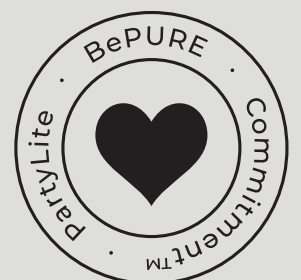

BEPURE COMMITMENT™

WHAT'S IN YOUR WAX?

We believe fragrance has the power to transform your home and life. That's why we strive to make products that have a positive impact on the environment and an uplifting influence on you, every single day. Our exclusive fragrances are created with world-renowned master perfumers and deliver a superior experience with every candle infused with fragrance from top to bottom. Discover the highest quality ingredients delivering the cleanest burn for you, your family, and your home.

THE PARTYLITE PROMISE

QUALITY THAT ENDURES

Our PartyLite BePURE Commitment™ guarantees the wax in our artisan candles is always free of

CONSCIOUS DESIGN

Maximising renewable resources, plant derived ingredients and recycled materials.

CRUELTY FREE

Never tested on animals.

ESSENTIAL OILS

Our artisan candles are created in small batches and contain natural essential oils.

CLEAN BURN

When there's a little wax left (1.3 cm/½") & minimal soot when used as directed.

NON-TOXIC

Free of parabens, phthalates and sulphates. Made with lead-free, 100% natural wicks.

MINDFULLY MADE

We choose to partner with sources we know produce the best ingredients ethically and legally, setting a top-tier standard for products that you can trust and love!

ARTISAN CANDLES

Our candles are created in small batches combining state of the art technology with artisan expertise every step of the way.

POURED IN THE USA AND EUROPE

Fragrances comply with worldwide safety standards and are proudly poured in the USA and Europe.

THE NO NO LIST™

1,4-Dioxane, Acetone, BHA, Carbon Disulphide, 2-Butanone, Carbon Tetrachloride, Chlorobenzene, Coal tar dyes: p-phenylenediamine and colours listed as "CI" followed by a five digit number, Cresol, Cyclopentene, DEA, Ethoxylated surfactants, Ethylbenzene, Formaldehyde-releasing preservatives, Hydroquinone, Lead, MEA, Mercury, Mineral Oil, Oxybenzone, Parabens, Paraphenylenediamine (PPD), Petrolatum, Phenol, Phthalates, Placental extract, Polyethylene glycol (PEG compounds), Silicone-derived emollients, Siloxanes, Sodium laureth sulfate, Sodium lauryl ether, Styrene Xylene, Talc, TEA, Tetrachloroethene, Toluene, Trichloroethane, Trichlorofluoromethane, Triclosan, Xylene

Our fragrances are crafted without any of these 40 questionable ingredients.

**THE
NO NO
LIST™**

LOVE IT GUARANTEE

All of our products are created with love and backed with our **100% Love It Guarantee**. If you're not absolutely delighted you may return your items for a refund within 60 days of purchase.

CARING FOR YOUR CANDLE

TOP CARE TIPS FOR A PERFECT CANDLE EXPERIENCE

TIP 1

Place candle holders on heat-resistant surfaces.

TIP 2

Be careful to remove dead matches or wick trimmings that can cause uneven burning.

TIP 3

Avoid direct sunlight or hot surfaces like TVs, terraces and tiled stoves.

TIP 4

Never leave burning candles unattended.

TIP 5

Use a snuffer to extinguish candle flames for a longer life.

THE BASICS

BEFORE LIGHTING A CANDLE

- ▷ We recommend burning PartyLite candles only in PartyLite Holders.
- ▷ Position candles at least 5 cm apart if burning more than one at the same time.
- ▷ Place candles on a flat and level surface.
- ▷ Avoid drafts or extreme differences in room temperature
- ▷ We recommend using a heat-resistant Holder when lighting scented wax jars on sensitive surfaces

TRIM THE WICK!

- ▷ Trim wicks to about 0.5 cm each time before lighting, to avoid them bending to the side.
- ▷ If a 'wick blossom' develops on the wick, extinguish the candle, allow to cool, remove the 'blossom' and then relight the candle.

HOW TO BURN YOUR WAX RIGHT

- ▷ For all candles, please take care to position the wick so that it points towards the centre. If the wick is not centered after extinguishing, please return to the starting position before the wax cools so that the scented wax jar can burn evenly. (Sufficient distance to the edge of the glass is important!)
- ▷ If the wick is too short and is in danger of 'drowning', extinguish the candle and use a tissue to remove some of the wax surrounding the wick.

Top Tip

The warmer the room temperature, the more easily candles liquefy.

EXTINGUISH THE FLAME

- ▷ A candle snuffer works best to extinguish a candle.
- ▷ If you don't have one make sure to blow gently so the liquefied, hot wax won't spill.

THE RIGHT RESIDUE

- ▷ With tealights and votives, a wax residue may sometimes remain in the cup or holder.
- ▷ To remove any traces of soot from a jar candle extinguish the candle. Allow the candle to cool completely and the wax to solidify. Then use a soft dry cloth to wipe away the soot.

SAFETY FIRST! SIMPLE RULES TO FOLLOW

- ▷ Keep burning candles out of the reach of children and pets.
- ▷ Make sure to maintain sufficient distance from flammable materials.
- ▷ Do not place candles on or anywhere near furniture or electrical devices that are not heat-resistant.
- ▷ A burning candle should never be moved. Liquid wax can cause injuries or damage to surfaces.
- ▷ Please pay attention to the advice on packaging and on our products.
- ▷ For safety reasons, extinguish the scented wax jar at a wax residue of approx. 1.5 cm or no longer light, as the glass base can become very hot. (There is also the burning time fulfilled).

BEBALANCED BY PARTYLITE™

ESSENTIAL OIL + PURE FRAGRANCE

Q: How many uses will I get out of one 30 ml bottle of BeBalanced by PartyLite™ Essential Oil + Pure Fragrance?

A: A 30 ml bottle of oil will last a minimum of 180 hours in the Illuminescents Warmer, and 300 hours in the Ultrasonic Diffuser.

Q: One 10 ml bottle?

A: A 10 ml bottle of oil will last a minimum of 60 hours in the Illuminescents Warmer, and 100 hours in the Ultrasonic Diffuser.

CARING FOR YOUR FLAMELESS SCENTS

MAKE SURE TO FOLLOW THE FOLLOWING STEPS AFTER USING MELTS

PartyLite's Scent Plus[®] Melts don't burn away like regular candle wax in the ScentGlow[®] Warmer

To remove used wax, let the dish cool to room temperature.

Place the dish in the freezer for about 30 minutes to shrink the wax.

Remove the dish from the freezer. Tip the dish to allow the wax to drop out. Repeat if necessary.

TOP TIP

To remove stubborn wax, flush the cooled dish with hot tap water.

Gently wipe away residue with a paper towel.
