# INTRODUCING THE FLAME SENSE FOR BOWLS & FIRE PITS

The Flame Sense valve is the solution for a certified match lit unit with added safety features and CSA certification. It does not require any batteries or electrical connections so installation is easier and simpler than ever. This unit is compatible with majority of T.O.P's fire features.

◇ **Thermopile Technology**

The thermopile sensors in this unit is the defining factor of safety. By using a thermopile sensor this unit will not release gas without a flame being present.

◇ **Automatic Flame Shut Off**

By using the same thermopile technology, the unit is able to sense if a flame has gone out and automatically turn itself off. This is great in case a sudden gust of wind or rainfall extinguishes your flames.

◇ **Electricity Free**

The unit does not use batteries or electrical current to operate. This makes it safe to install near bodies of water, eliminates the need to run electrical lines and eases up installation.

◇ **Easy Installation**

The valve uses two simple gas in & gas out inlets. Simply connect two gas hoses with flared fittings to get this unit running.

◇ **Weather Tested**

Proven to operate properly in mild wind, rain & snow.

◇ **Compact Construction**

The small construction allows it to be installed in tight spaces.

◇ **1 Year Limited Warranty**

Covers all components of the Electronic Ignition System

## 12V/110V FIRE BOWLS

## 12V/110V FIRE & WATER BOWLS

### Liquid Propane

Liquid Propane applications require a Brass Air Mixer Orifice. This orifice integrates air into the propane for a cleaner burning flame. This prevents soot from being created and staining the unit and other surroundings.

### Natural Gas

Natural Gas applications come with a brass orifice mounted directly underneath the burner. Key Valves must be mounted within arms reach of the burner.

**NOTE:** Key Valves may be installed onto the face of the bowl. To have your bowls shipped like this for an addi-

tional fee, add OPT-KVI to your order (Includes Key Valve, Whistle Free Hose & Installation)

### Mounting Brackets

All fire bowls come shipped with a mounting bracket. This mounting bracket provides ventilation and a secure mount.

**WARRANTY IS VOID IF THE MOUNTING BRACKET IS NOT INSTALLED.**

### Propane & Glass

It is not recommended to use any sort of fire glass or glass pebbles in Liquid Propane applications. Propane is 1.5x heavier than air and sinks, decorative glass is dense and may not allow the propane to properly rise. Propane may collect and pool under the surface of the glass or inside the enclosure creating a potentially dangerous situation.
