- Able to Finish with Combustible Around the Fireplace

Glass Viewing Area:  
Lyon 48 NG – 15.34” H x 45.16” W

Side View Area Dimensions:  
Lyon 48 NG – 15.34” H x 13.40” W

No Limitations

The Technology

- All Contained within the fireplace
- No Gaps
- No Louvres
- No Heat Dump
- Wood and Drywall – Combustibles Okay
- Quick and Simple Installation. No technician required for cleaning inside the glass

No Gap

With a lot of fireplaces, they need to create an escape for the heat to vent out. To do this they leave a gap at the top of the fireplace wall to create a crown to hide the opening. A gap is not necessary.

IDEAL APPLICATIONS

- New builds & Renovations
- Restaurants
- Commercial Spaces
- Condominiums

No Intake or Exhaust Louvres

Your wall will not have any intake or exhaust louvres to break up the look.

No Heat Dump

There are no vents required behind the wall of the fireplace to dump the built up heat.

Combustibles Okay

Everything is contained within the firebox. Able to finish with combustibles around the fireplace. No special concrete board or metal studs

See Heat Shield information on page 17.

THE AUSTIN 65L

DELUXE DIRECT VENT LINEAR

Just like it's little brother, the Stanford, the new Austin features a sleek contemporary linear look. At 65” it now features our largest viewing area with our signature large flame presentation. The Austin comes standard with our Deluxe system including 7 day programmable thermostat remote, 6 stage dual fan control and modulating valve so you can control the flame. This unit is available in gas and liquid propane (LP by special order). Contemporary black porcelain panels, black reflective glass and 9 piece rock set all come standard with this stunning gas fireplace. A surround with safety barrier is mandatory.
