WE TAKE PRIDE IN OUR QUALITY

At JMP Wood, we believe your stair is furniture you walk on. With our quality, experienced craftsmanship paired with our expert service, we guarantee you will be impressed.

About Us

Giuseppe and Michael Cangelosi

Giuseppe "Zep" Cangelosi
Rosalia Cangelosi

JMP is a family-owned business founded by Giuseppe Cangelosi, initially providing handmade unique display fixtures to all kinds of boutiques and department stores. Beginning as "JMP Display Fixtures" Giuseppe (Joe) Cangelosi along with brothers Mario & Peter set up shop in Brooklyn, New York circa 1974 to show the world their talent at creating unique wood display fixtures. Since the family trade was passed down to Joe's son, Michael, JMP Display Fixtures expanded to JMP Wood Stairs & Rails and JMP Woodturning. Combining timeless knowledge of wood management along with new age designs and technology, JMP is an unstoppable leader in the millwork/stair part industry.

When priceless craftsmanship meets new age technology, the competition just doesn't compare. Through specialization in the manufacturing of newel posts, balusters, columns, table legs, tangent rails and much more, JMP has branded themselves as a staple in the woodworking industry. JMP's evolution into a fully blossoming corporation consisting of a full staff of the finest artisans, tools and machines is proof that the manufacturing industry is still going strong, and you can't put a price on American made goods. We take pride in our work and assure you that JMP is the best choice for quality and craftsmanship and we take every order one step at time!

How to Order?

All items can be purchased through our online portal at www.jmpwood.com.

If you have trouble placing an order online, or require assistance, please email our customer support team at orders@jmpwood.com or give us a call at **908.777.1JMP (567)**

Bulk Pricing

For bulk orders and pricing, please **contact us**. Pricing may vary depending on shipping and product availability.

Payment Methods

We accept all forms of payment including all major credit cards (Visa, MasterCard, Discover and American Express), checks, cash and money order.

Stairpart Identifier

Left Open Box Stair

1. **Starting Step** The first step of a stair system. It tends to be ornate and is typically wider than any of the other steps.
2. **Riser** The vertical plane of a stair that faces each step between stringers and tread.
3. **Tread** This is the portion of the step on which you place your feet.
4. **Baluster** A vertical piece, plain or decorative, that is used between railing and tread or floor.
5. **Newel** Also called a central pole, it is the major supporting pillar of a balustrade system, typically located at the bottom and top of a stairway, or at a turn in a handrail.
6. **Volute** A fancy spiral formation found at the bottom end of the handrails.
7. **Turnout** An ornamental item that usually flares left or right and attaches to the beginning of the rail.
8. **2 Rise Gooseneck** A rail fitting that permits a change in direction, used where rake rail rises vertically to a balcony or landing.
9. **Stringer** The structural component that supports the treads and risers. There are two stringers on a staircase typically, one on either side of the stairs. (Boxed or Open)
10. **Facia** The decorative board that fastens along the wall on the open side of the staircase.
11. **Handrail** The hand support in a stair system.
12. **Rail Fittings** Fittings are assembled parts that match particular hand rail patterns. They allow for directional and vertical changes with the hand rail in over-the-post balustrades.

Double Open Rise Stair

13. **Freestanding Stair** A stairway that is not supported by walls.
14. **Landing** A large horizontal platform between the flights of stairs. Landings allow for directional changes in stairs.
15. **Box Newel Post** Also called a central pole, it is the major supporting pillar of a balustrade system, typically located at the bottom and top of a stairway, or at a turn in a handrail.
16. **Rake Rail** Hand rail used on the ascending section of a balustrade. It follows the pitch of the stair.
17. **Half Newel** A newel post that is typically cut vertically and mounted against the wall, used mainly for aesthetic purposes.
18. **Level Rail** Handrail used on the landing portion of a balustrade.
19. **Landing Tread** A part used at the top of a staircase or beginning of a balcony that allows for transition into the landing.
20. **Total Rise** Refers to the total height your stair needs to be. Synonymous with "Finish to Finish" rise as it refers to the measurement from the top of the finished first floor to the top of the finished second floor.
21. **Total Run** The measurement of how far your stair extends from the wall. Key measurement if your stair is going between walls.

Wood Types

POPLAR | *Populus*

Fine textured, soft and lightweight. Easily worked and takes paint exceptionally well. Frequently finished to look like other woods. **Recommended for painting.**

RED OAK | *Quercus Rubra*

Straight grain with coarse texture. Large open pores produce distinctive grain. Generally works and finishes well.

WHITE OAK | *Quercus Alba*

Finer texture than Red Oak. Heartwood is decay resistant and suitable for exterior use. Good turning and steam bending qualities. **Great for staining.**

MAPLE | *Acer*

Fine, even texture and natural luster. Known for its durability and strength. It has excellent turning properties. Paints and finishes well.

SAPELE | *Entandrophragma cylindricum*

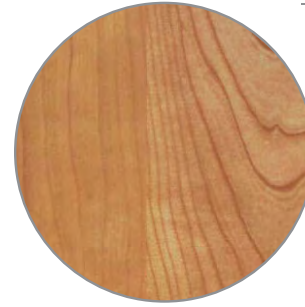

Texture rather fine; grain interlocked; sometimes wavy. Lustrous. Turns fairly well. Excellent substitute for genuine Mahogany. **Great for outdoor applications.**

CHERRY | *Prunus Avium*

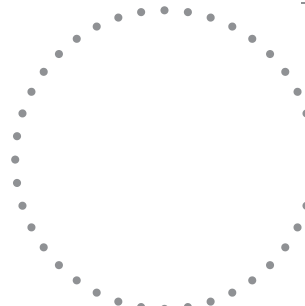

Finely textured, strong, and easy to work. Highly rated in all working properties including wood bending and turning. Becomes darker and richer with age.

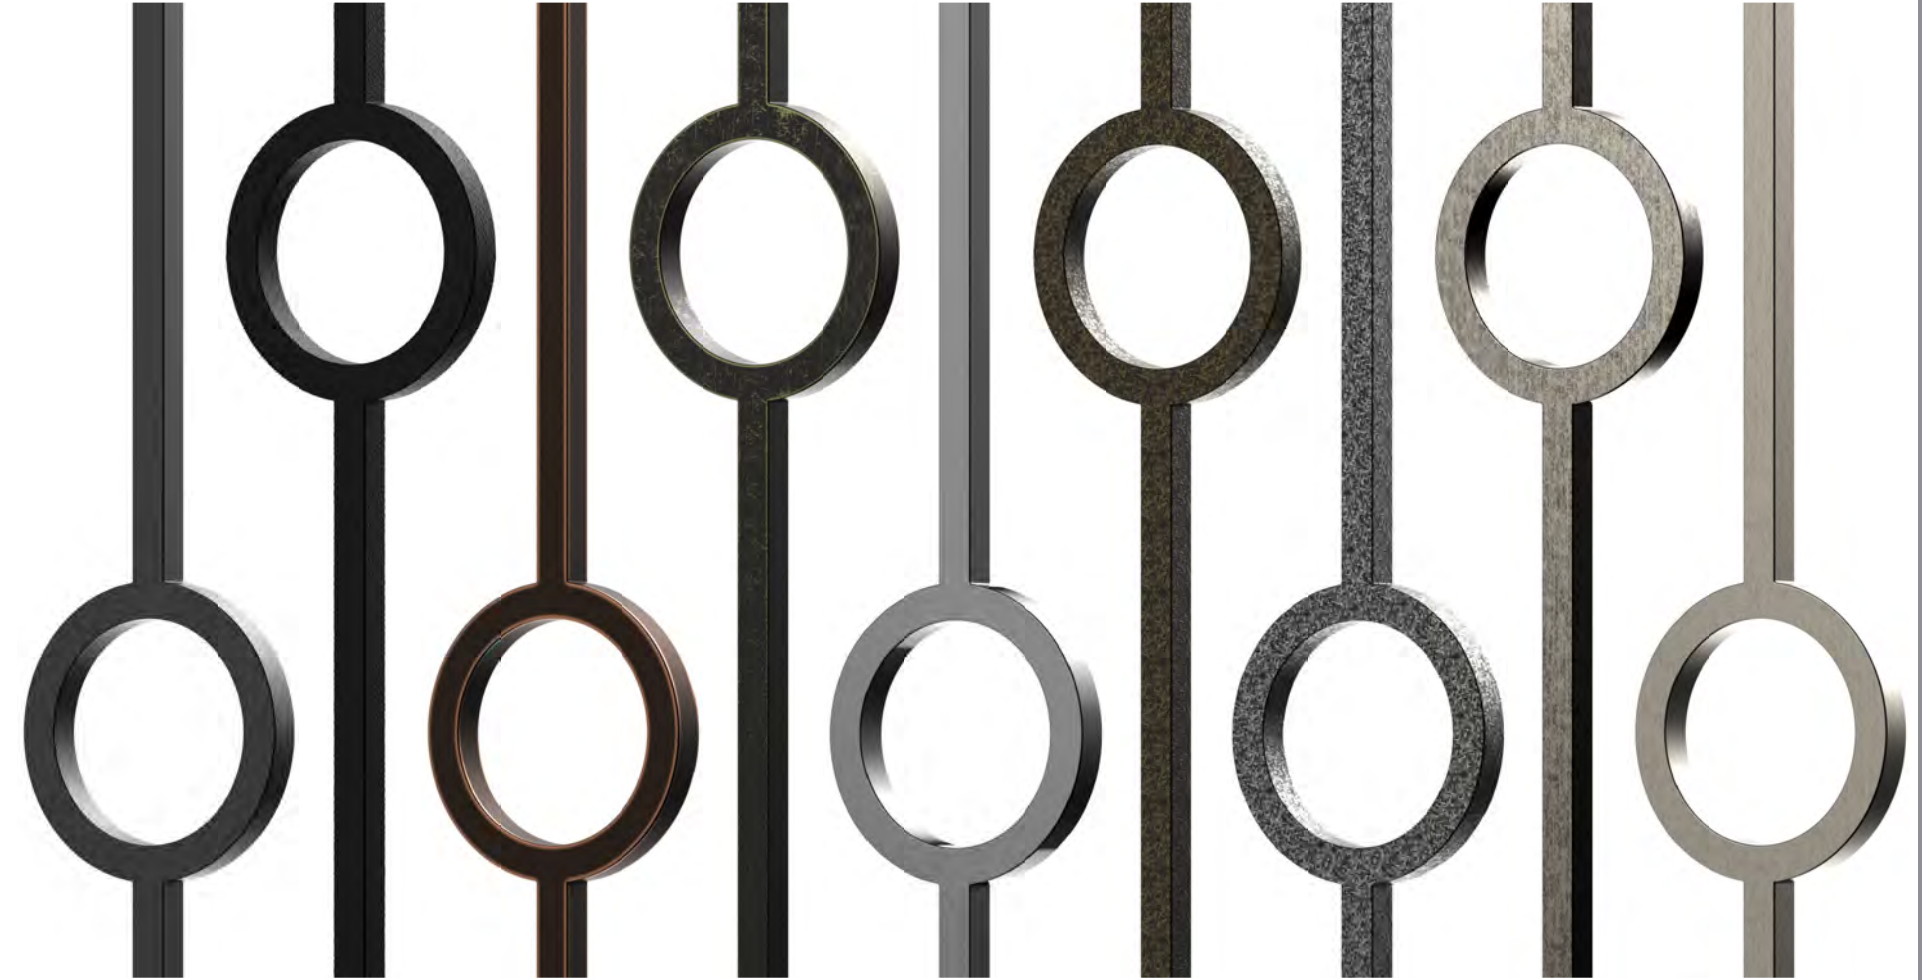

ANY SPECIES

If you see an item that is not in the species you are looking for, please give us a call at 718.303.7777 to receive a quote!

Newel Plate Fastener

Key Lock Newel Fastener

Big Bolt Newel Fastener

Product Specs:
 RO, MAP Plugs

Frequently Asked Questions

What wood do you recommend?

We recommend poplar/maple if you are painting and red/white oak if you are staining. Sapele for a darker, natural finish.

I am building my stair outdoors...

For outdoor we recommend sapele and cedar. Please state on your order that the parts you are purchasing are for outdoor purposes.

Do you install?

No, we do not install. We manufacture and supply both standard and custom stair parts for contractors and homeowners.

Can you recommend someone that can install?

Unfortunately we can not recommend any installer due to fair competition.

Can it be shipped?

All of our products can be shipped via boxes or freight to all 48 states (Alaska and Hawaii, extra fees may apply). Shipping time and cost may vary depending on location, as well as size and weight of the product.

Still have questions?

Contact us:

E info@jmpwood.com

T 908.777.1567

T 718.303.7777

What is considered an oversized package?

Any order that exceeds 50 pounds or if the package dimension is over 95.5 inches.

The product arrived damage or incorrect.

Please refer to our terms and conditions for more details about our return policy.

Do you do site measurements?

Yes we do offer the service of measuring. The cost of the site measurements will depend on the project and location. To receive a quote, please email us information regarding your site address, job description along with pictures and drawings of site conditions.

What is the status of my order?

Due to the large amount of orders we can have at one time, it will be difficult for us to provide a status update for your order. To inquiry for an update, please email us at orders@jmpwood.com or call 718.303.7777

I am looking to get a quote on a custom order.

Please email as much information as possible about your order to custom@jmpwood.com. Please include your name and contact information and a detailed description of your project in order for us to get back to you.

Terms and Conditions

Pricing

- All items are priced per single piece or per linear feet unless otherwise specified.
- Bulk pricing available / wholesale
- All special sales, discounted rates or VIP pricing can not be combined and can only be applied a single time per an order. Any discounted rates are not applicable to any custom orders.
- For pallet pricing, please contact us for availability and shipping rates.
- There is no minimum order quantity, but there is a set minimum cost of shipping and handling may be applicable.
- All pricing and product availability are subject to change without notice. Please visit our website for up-to-date pricing or contact us at info@jmpwood.com

Delivery

- JMPWOOD holds no responsibility if a client (buyer) is absent or fails to receive delivery via a third party at a scheduled time window and may be subject to additional delivery fees for rescheduling.
- Any rescheduling for delivery must be notified at least 48 hours in advance to be honored.
- For local delivery, please contact us at info@jmpwood.com for availability and pricing.

Shipping & Lead Time

- If an item is in stock, the lead time is usually 1-3 business days. Any order placed after 12pm noon will be processed during the next business day.
- JMPWOOD ships to all 48 states (Hawaii and Alaska, extra fees may apply) and U.S. territories via LTL UPS Ground or USPS. Please contact us for details for international shipping.
- All items are shipped with a tracking number that will be emailed once the package has shipped.
- All freight and handling charges are subject to change without notice, as it is a third party service and JMPWOOD is not responsible.
- If you would like to expedite your order, please contact us at info@jmpwood.com
- Items over 8 feet will ship via LTL and may require extra charges
- Insurance can be purchased and is recommended especially on custom made to order items

Payment

- All purchase orders are paid in full unless specified otherwise.
- All purchase orders are subject to all taxes and shipping fees unless specified otherwise. Please provide us with any tax exemption prior to placing an order.
- In order to open an account with JMPWOOD, you first submit a credit application/credit approval and it may take up to 30-120 days for processing. JMPWOOD holds all rights to reject your application for line of credit without cause.
- A recurring service charge of 2% may be applied to outstanding balances past 30 days.
- Any payment process via credit card (VISA, MASTERCARD, AMERICAN EXPRESS, ETC) can be subjected to a processing fee up to 5% on invoice.
- There is an \$50 additional fee on any returned/bounded checks.

Returns

- Items must be in its original carton and deem in a resalable condition by JMPWOOD in order to be accepted for return.
- Any item that is cut, damaged, stained, painted or modified in anyway will not be accepted for returns.
- Any made-to-order parts are not eligible for returns. Any custom or made-to-order item can not be canceled once production has started.
- A 15%-25% restocking fee may apply on any returned products.

Incorrect Product or Damage Upon Arrival

- Any claim of damage on arrival must be noted on the bill of lading along with a signed damage report from the driver, in order for us to process your claim. All claims must be submitted within 24 hours of receiving the product. Please provide photographic evidence of damages to assist your claim.
- Any incorrect items or shortage of items, must be reported within 24 hours upon receiving the product shipment.
- JMPWOOD holds the claims to all damaged items or incorrect items and may ask for those specific items to be returned in arrived condition.

Nature of Wood Products

- There will be some unavoidable color and grain variation in items due to the unique nature of wood. Wood naturally expands and contracts due to changes in temperature and humidity. Because of this, it is perfectly normal for all wood products to possibly experience slight separation at wood joints or slight warping over time with changes in temperature/seasons. This does not affect the structural integrity of the stairs and rails. We take every precaution to minimize this, but a humidity control system may also be used in the home to further reduce the possibility of natural wood expansion and contraction. To further reduce the possibility of natural wood warping, splitting, contraction or expansion, we recommend finishing/sealing all sides of the stairs, including parts that are not visible. This forms a protective seal, making the wood less prone to expansion and contraction.
