

Revibe Connect is a system designed to enhance focus and attention in the classroom, utilizing anti-distraction wristwear and an app that tracks progress.

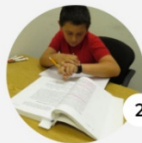

The wristwear sends whisper-quiet vibration reminders to the user, gently prompting them to get back to what they are supposed to be doing.

Users are encouraged to "tap-back" on the device (twice if on-task, once if off-task). This personalizes their vibrations, while collecting easy-to-read data for you. Throughout our pilot study, there were no complaints from students, teachers, or peers regarding tapping.

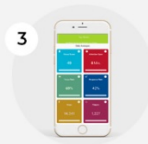

how it works STEP BY STEP

ATTENTION DRIFTS...

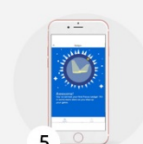

REMINDER VIBRATION SENT. STUDENT TAPS REVIBE ONCE TO REPORT IF THEY WERE OFF-TASK, OR TWICE IF THEY WERE ON-TASK.

DATA IS COLLECTED ON STUDENT'S FOCUS, RESPONSIVENESS, STEPS, & FIDGETS. DATA IS SENT TO CLOUD.

PARENTS AND TEACHERS CAN VIEW UPDATES ON THE STUDENT'S BEHAVIOR THROUGH THE APP.

STUDENTS SEE ENCOURAGING MESSAGES AND ANIMATED ICONS AS THEY IMPROVE!

Download the **Revibe app** (iOS/Android) to your smartphone or tablet and sync the devices to the app to see users' focus data update in real-time.

Funded in part by the U.S. Department of Education, Revibe leverages technology to level the playing field for kids in the classroom, regardless of background, special needs, or diagnosis.

Thank you for your support, Teachers!
