1. WHAT ARE COOKIES?

Cookies are small text files that are stored on your computer or mobile device when you visit a website. They allow the website to recognise your device and remember if you have been to the website before. Cookies are a very common web technology; most websites use cookies and have done so for years. Cookies are widely used to make the website work more efficiently. Cookies are used to measure which parts of the website users visit and to personalise their experience. Cookies also provide information that helps us monitor and improve the performance of the website.

2. COOKIE SETTINGS

If you do not want cookies to be dropped on your device, you can adjust the setting of your Internet browser to reject the setting of all or some cookies and to alert you when a cookie is placed on your device. For further information about how to do so, please refer to your browser ‘help’, ‘tool’, or ‘edit’ section. Please note that if you use your browser settings to block all cookies, including strictly necessary cookies, you may not be able to access or use all or parts of the functionalities of the website.

If you want to remove previously-stored cookies, you can manually delete the cookies at any time. However, this will not prevent the website from placing further cookies on your device unless and until you adjust your Internet browser setting as described above.
