

April 2023 GREAT NORTHERN BRASS MODEL SPRING CLEANING BLOW-OUT SALE AS-IS / ALL SALES FINAL

This group of Great Northern Railway brass model trains was one man's collection. He did what he chose to do with these models. Most are new but have *horrible* paint. Many of these models were custom painted by the owner when the models were newly imported. His painting efforts were poorly done, and the plastic wrap on the models further ruined the paint because the models were stored in a hot garage for an extended period. The plastic left telltale markings on many of these models. Some models do run fine. Others don't run at all but that's simply because they've been sitting idle for so long. The owner had no layout, so these models were not used on track. There are a few factory-painted models that look just fine and those are noted below. We're selling these models AS-IS. While most are painted into Great Northern colors some of them are wearing fantasy schemes that were never actually applied to the prototypes. Just a few models have a loose or broken off part. Getting them into proper working order will be your task as buyer. All sales are final. Shipping charges will be based on our costs via UPS or USPS and will be quoted at the time you place an order. If you have a question about any of these models, feel free to ask but please understand that these models are first come first served. At these prices we do not have model images available as that would double the cost to account for that extra work. So please enjoy the opportunity today at these blow out prices.
