COLLECTION of UP

Designer Ufuk CEYLAN

UP CHAIR

Standing out with its retro futuristic style, the Up series brings together different materials as Lagu's signature design approach. Creating a soft appearance with the combination of leather and cotton fabric, UP CHAIR stands out with its full form and comfort. The chair, which will instantly adapt to the space of those who love Mid Century style, will make it easier for you to create a calm and elegant room with its striking brass legs.

USER GUIDE

USER GUIDE OF BRASS AND IRON

Avoid leaving household liquids (oil, red wine, vinegar, etc.) on the surface. In particular, products that contain citric acid (present for example in fruit, citrus fruit and tomatoes) act on contact with the treated surface, removing its original sheen. Always clean stains while they are still fresh. For routine maintenance use a microfiber cloth and water. Do not use products containing acids.

USER GUIDE OF UPHOLSTERED FURNITURE

When your upholstery is made up of fine fabrics, leather or leatherette, remember that direct sunlight will destroy your upholstery with prolonged exposure. The ultraviolet rays in sunlight work to deteriorate the condition and lifetime of your upholstery. A little exposure to the sun every now and then is harmless, but do keep your favourite upholstered furniture out of harm's way by drawing the blinds or placing them out of areas that receive direct sunlight. The longer you avoid vacuuming your upholstery, the worse the damage. Dust settles on everything in your home, your upholstery included. Whenever you sit on your sofas and chairs, the weight forces the dust down deeper into the fibers of the upholstery. With prolonged periods of no maintenance, the dust acts like an abrasive, cutting, and scraping your upholstery on a microscopic level, thus causing the material to wear out a lot faster. You should regularly flip your upholstered cushions (both the seat and the back cushions) depending on the frequency of their use. You will find that your upholstery will wear out evenly and your cushions will maintain their shape for longer.

USER GUIDE OF LEATHER

For everyday cleaning, simply wipe the surface with a clean, dry, non-abrasive, preferably white cloth. Dry dirt can be easily removed with the use of a soft bristle brush. You can also use a medium power vacuum cleaner with a suitable attachment, and avoid rubbing the surface with it. Any stains caused from water soluble substances (soft drinks, coffee, tea, milk, chocolate, oil, grease, make-up) should be removed quickly by gently dabbing the surface with a dry cloth or paper towel. Do not use a hairdryer and avoid exposing to direct sunlight.
