ADVANCED Ultrasonic Bat Repelling System

QUICK GUIDE

Speakers
Location

Right Side

Step 1 Remove your Advanced Bat Repeller from its box & set all the Bat Repelling Switches using our recommended settings.

Step 2 On the **Right Side** please set the **Bat Power Switch** to **Full Power**. Your device will run Full Time, which is exactly what you want at the beginning stages of repelling. The Night Light switch is an option and the Test Button simply allows you to hear an audible version of what the bats hear.

Step 3 Now on the **Left Side** please set the **Bat Targeting Switch** to **Stage 1** (Best Setting) and set the **Bat Confusion Switch** to **Batonic 2**.

Left Side

Step 4 Now that all settings are set, place your device close to the infested area. For problems with Bats hanging out upside down, do your best to **face the speakers directly toward** these areas (**extension cords work great for placement**).

Note You may ask why we have multiple settings and the answer is that “Change is Key” for Bat Repelling success. These are the recommended settings, **but feel free to use your instructions booklet** for more info and to **follow** our **Full Repelling Change Techniques**.

If your Bat Problem still persists after the 16-20 day mark.
Please Contact us as we will Move to a Stage 2 worth of Help/Repelling
