Ultrasonic Insect Repelling System

We Care About Your Results

Hi, everyone, this is Ron with Cleanrth Products & we are dedicated to positive insect-repelling results.

If for some reason your results are not met at around the 16-20 day mark, please take the time to Contact Us.

We will move to a **“Stage 2”** worth of help/repelling your insect pest issue.

As a business owner, I understand the frustration of pesky insect problems & I wanted to let you know that we’re here to help you when a tough problem comes along.

Finally, I’d like to let you know that **1 Star Reviews really hurt our small company’s business.**
 If you do run into a problem, please if you would give us that second chance at resolving your insect Issue. *We Have Solutions For the Real Tough Pesky Insect Issues!*

Best Ways to Contact Us

1. If Ordered Online, it’s **“BEST”** to **Contact Us** via the **website** you ordered from (e.g., Amazon, Walmart, Sears, etc.).
2. Company E-mail: info@cleanrth.com
3. By Phone: Local 1-480-255-5113 or Toll Free 1-855-707-7075

Specifications

Product Dimensions: W-3.5in x H-6in x L-2in
 Item Weight: 6 Ounces
 Power Input: 85-135V AC Plug-in Only 50Hz-60Hz
 Power Consumption: 2 - 5 Watts
 Repelling Coverage: 7,000 Square Feet “Open Area”

EPA Est. No. 085464-CHN-001
 FC CE

INSTRUCTION - BOOKLET

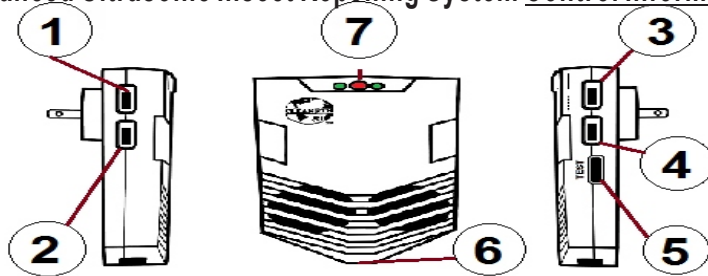

We care about your results!

Customers have reported success repelling:

Advanced Ultrasonic Insect Repelling System Control Information

① Insect Targeting Stage 1 or Stage 2

Insect Targeting has Two Insect Targeting Stages. Having two stages allows you to change the High-Intensity Ultrasonic Sounds to maximize insect repelling results. Use **Stage 1** for the first 6 weeks of use. As some insect problems can be very stubborn, please change to **Stage 2** if results not met after 6 weeks. (Please read [Insect Repeller Instructions](#) for more details)

② Insect Confusion Insectonic 1 or Insectonic 2

Insect Confusion Switch changes the way the High-Intensity Ultrasonic Sounds come out of each speaker. This function greatly helps the insect repelling process by varying the High-Intensity Ultrasonic frequencies.

Insect Confusion has 2 settings **Insectonic 1** or **Insectonic 2**.

Insectonic 1 = Two constant High-Intensity Ultrasonic Sounds. These ultrasonic sounds blast out of each speaker like a train horn at two different sound ranges. (We recommend using **Insectonic 1** for the first week. If you are seeing adequate repelling results leave it on **Insectonic 1**. If not, switch over to **Insectonic 2**.)

Insectonic 2 = Turbulent Storm: a siren effect cycling through all the High-Intensity Ultrasonic frequencies the Advanced Ultrasonic Insect Repeller has to offer.

Example of Insectonic 2: In this setting, the speakers emit a wide range of High-Intensity Ultrasonic Sounds dedicated to targeting insects out; this effect is similar to an anti-insect, air raid siren. Control over these many features increases your opportunities for Change. **Changes Gets Better Results!**

③ Insect Power Full Power or Chaotic

Full Power: In this mode, the Advanced Ultrasonic Insect Repeller runs continuously. We recommend using this setting until your pest problem is gone.

Chaotic: In this setting, the Advanced Ultrasonic Insect Repeller turns each ultrasonic speaker on and off which leads to a very disorderly sequence of ultrasonic sound waves. Chaotic mode saves 50% on the normal 5 watts power consumption. In **Chaotic Mode**, it is common that you will hear a slight **clicking noise** as this is the sound of the speakers turning on and off. For this reason, we suggest using Chaotic as a last resort if you're not succeeding in the Full Power Mode.

④ Night Light

This switch turns the night light On and Off.

⑤ Test Button

Pressing the test button allows you to hear the way the Advanced Ultrasonic Insect Repelling System emit sound at an audible level. **CAUTION: To prevent hearing loss do not use Test Button for long periods of time.**

⑥ Night Light

This is the location of the Night Light.

⑦ Speaker Indicator Lights

Red Light: Flashes continuously when operating / plugged in.

Green Lights: These lights represent the left and right speaker. When **Insect Power** is set on **Full Power**, both green lights will be on at all times. When **Insect Power** is set on **Chaotic**, The green lights will alternate turning on and off to indicate which speaker is currently in operation.

Advanced Ultrasonic Insect Repeller Instructions

1) Setting Insect Targeting

First thing you should do is set the **Insect Targeting** switch to **Stage 1**. Use this setting for 6 weeks, if results aren't meet by then change to **Stage 2**.

2) Setting Insect Confusion

Insectonic 1 We recommend using this setting for the first week. After 1 week, check your results: if they're good leave on the **Insectonic 1**. If the insects haven't seemed to react, then switch to **Insectonic 2**.

Insectonic 2 If results were not met on **Insectonic 1** after 1 week, we recommend moving over to **Insectonic 2**. **Insectonic 2** is the best setting for insect pest problems, but following our routine **Maximizes Results!**

3) Setting Insect Power

Set **Insect Power** to **Full Power** and use this setting until the pest problem is fully repelled. **Chaotic** is mostly used in areas like garages, barns, and warehouses because of the clicking noise in produces. In some hard insect repelling cases **Chaotic** can give you a positive result.

4) Electromagnetic Deep Inner Wall Repelling

There is no need to set anything as the Electromagnetic feature works in tandem with Insect Targeting, Insect Confusion and Insect Power. The Electromagnetic Inner Wall Repelling feature does not increase the Electromagnetic field but instead, uses the existing field and tones it to help **repel insects found deeper in walls than the sounds can reach alone.**

Not seeing adequate results at the 16 day mark of repelling, Please let us Help: info@cleanrth.com or 480-255-5113
