

Running the Insect-Repelling Routine & What to Expect

1) Once set up & turned on, please allow 10 - 12 days worth of repelling in 1 spot:

This is how Cleanrth's Advanced Ultrasonic Insect Repeller works:

Imagine that you hear a nearby car alarm going off. The sound is very annoying, but it's not enough to make you leave the area immediately. Eventually though, if the sound continues, you'll move to a different area and avoid that location as much as possible.

Insects within the repelling-sound area feel *Uncomfortable, Disorientated & Disturbed*.

Insects outside of the repelling area will feel Normal and Comfortable again.

Over time, this uncomfortable feeling trains the unwanted insects to avoid the area. Insects tend to take more time to repel than say a Rodent Pest Issue.

You may actually notice more insect activity after turning the device on. Insects aren't as smart as say a Rodent Pest Issue; they don't know where your front door is located. They can also be stubborn, especially if they have access to easy food or a nest in the area. It takes time but they will eventually leave the area.

It can take 4-6 weeks to fully clear out an area of insects, but we typically see positive results within 16-20 days (sometimes sooner) of starting this insect-repelling training

2) Use the 10th and 12th day as a check point:

Do you still see insect activity on this day? Has the issue diminished at all? If the problem has improved; great, please continue to use the device in its current settings.

If the insects are still a **major problem then its time to make a change with the device**: Still please make sure **Insect Targeting Switch** is set to Stage 1, **Insect Power Switch** is set on Full Power. Now, depending on what you had it set to before, please change **Insect Confusion Switch** from Insectonic 1 to Insectonic 2 or Insectonic 2 to Insectonic 1. Also just double check and make sure you feel the Cleanrth Insect Repeller is facing the best possible position so that it has clear view of the area your trying to repel; extension cords work great for better positioning.

Change in repelling is Key to Insect Repelling Success! After making these changes, please allow another eight days of repelling.

3) Use the 20th Day as your last checkpoint:

Has the issue diminished? If not, then it's time for us to help. Please Contact Us and we will move to what we like to call our *Stage II* worth of help: **Free of Charge**.

As a company, we are here to help you solve any tough insect issues.

Ways to Contact Us:

- 1) If **Ordered Online**, it's **"BEST"** to **Contact Us** via the **website you ordered from** (e.g., Amazon, Walmart, Sears, etc.).
- 2) Our Business E-mail: info@cleanrth.com
- 3) Local Phone: 1-480-255-5113
Toll Free Phone: 1-855-707-7075
