

# Running the Pest-Repelling Routine & What to Expect

## 1) Once set up & turned on, please allow eight days worth of repelling in one spot:

This is how Cleanrth's Industrial Electronic Pest Repeller works:

Imagine that you hear a nearby car alarm going off, but much more intense and disorientating for the Pests. These sounds can drive pests out pretty quickly but in some cases it takes time to train the area.

Pests within the repelling-sound area feel *Uncomfortable, Disturbed, and even Disorientated*. Pests outside of the repelling area will feel Normal and Comfortable again.

Over time, this uncomfortable feeling trains the unwanted pests to avoid the area.

You may actually notice more pest activity after turning the device on. Pests aren't as smart as humans; they don't know where your front door is located. They can also be stubborn, especially if they have access to easy food or a nest in the area. It takes time but they will eventually leave the area.

*We typically see positive results within 16-20 days (sometimes sooner) of starting this pest-repelling training -- please note that it can take 4-6 weeks to fully clear out an area of insects.*

## 2) Use the 8th to 10th day as a check point:

Do you still see pest activity on this day? Has the issue diminished at all? If the problem has improved; great, please continue to use the device in its current settings.

If the pest issue is still a **major problem then its time to make a change with the device**: Still please make sure the **Target Switch** is set to the appropriate pest issue you want to repel and the **Pest Power Switch** is set on Full Power. Now, depending on what you had it set to before, please change the **Confusion Switch** from 2 Fixed to Wide Var. or Wide Var. to 2 Fixed. Also just double check and make sure you feel the Cleanrth Industrial Repeller is facing the best possible position so that it has clear view of the area your trying to repel; extension cords work great for better positioning.

Change in repelling is Key to Pest Repelling Success! After making these changes, please allow another eight days of repelling.

## 3) Use the 16th to 20th Day as your last checkpoint:

Has the issue diminished? If not, then it's time for us to help. Please Contact Us and we will move to what we like to call our *Stage II* worth of help: **Free of Charge**.

As a company, we are on your side and are here to help you solve the tough pest issues.

## Ways to Contact Us:

- 1) If **Ordered Online**, it's **"BEST"** to **Contact Us** via the **website you ordered from** (e.g., Amazon, Walmart, Lowes, etc.)
- 2) Our Business E-mail: [info@cleanrth.com](mailto:info@cleanrth.com)
- 3) Local Phone: 1-480-255-5113  
Toll Free Phone: 1-855-707-7075
