Ultrasonic Rodent Repelling System

We Care About Your Results

Hi, everyone, this is Ron with Cleanrth Products & we are dedicated to positive rodent-repelling results.

If for some reason your results are not met at around the 16-20 day mark, please take the time to Contact Us.

We will move to a "Stage 2" worth of help/repelling your rodent pest issue.

As a business owner, I understand the frustration of pesky rodent problems & I wanted to let you know that we're here to help you when a tough problem comes along.

We Have Solutions For the Real Tough Pesky Rodent Issues!

Best Ways to Contact Us

1. If Ordered Online, it's **"BEST"** to **Contact Us** via the **website** you ordered from (e.g., Amazon, Walmart, Lowes, etc.).
2. Company E-mail: info@cleanrth.com
3. By Phone: Local 1-480-255-5113 or Toll Free 1-855-707-7075

Specifications

Product Dimensions: W-3.5in x H-6in x L-2in
 Item Weight: 6oz
 Power Input: 85-135V AC Plug-in Only 50Hz-60Hz
 Power Consumption: 2 - 5 watts
 Repelling Coverage: 7,000 Square Feet "Open Area"

EPA Est. No. 085464-CHN-001
 FC CE

Ultrasonic Rodent Repelling System

INSTRUCTION - BOOKLET

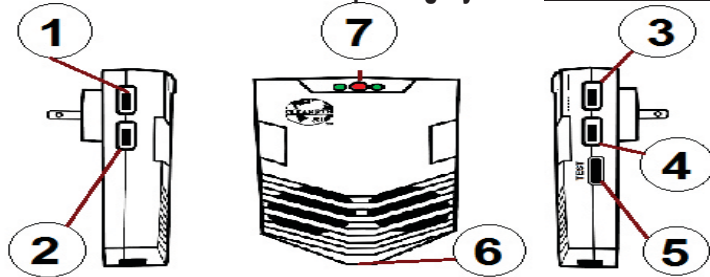

We care about your results!

Advanced Ultrasonic Rodent Repelling System Control Information

① Rodent Targeting Stage 1 or Stage 2

Rodent Targeting has Two Rodent Targeting Stages. Having two stages allows you to change the High Intensity Ultrasonic Sounds to maximize rodent repelling results. Use **Stage 1** for the first 6 weeks of use. As some rodent problems can be very stubborn, please change to **Stage 2** if results not met after 6 weeks. (Please read **Rodent Repeller Instructions** for more details)

② Rodent Confusion Rodentonic 1 or Rodentonic 2

Rodent Confusion Switch changes the way the high impact ultrasonic sounds come out of each speaker. This function greatly helps the rodent repelling process by varying the high intensity ultrasonic frequencies.

Rodent Confusion has 2 settings **Rodentonic 1** or **Rodentonic 2**.

Rodentonic 1 = Two constant High Intensity Ultrasonic Sounds. These ultrasonic sounds blast out of each speaker like a train horn at two different sound ranges. (We recommend using **Rodentonic 1** for the first week. If you are seeing adequate repelling results leave it on **Rodentonic 1**. If not, switch over to **Rodentonic 2**.)

Rodentonic 2 = A siren effect cycling through all the high intensity ultrasonic frequencies the Advanced Ultrasonic Rodent Repeller has to offer.

Example of Rodentonic 2: In this setting, the speakers emit a wide range of High Intensity Ultrasonic Sounds dedicated to targeting rodents out; this effect is similar to an anti-rodent, air raid siren. Having control over these many features increases your opportunities for Change. **Changes Gets Better Results!**

③ Rodent Power Full Power or Chaotic

Full Power: In this mode, the Advanced Ultrasonic Rodent Repeller runs continuously. We recommend using this setting until your pest problem is gone.

Chaotic: In this setting, the Advanced Ultrasonic Rodent Repeller turns each ultrasonic speaker on and off which leads to a very disorderly sequence of ultrasonic sound waves. Chaotic mode saves 50% on the normal 5 watts power consumption. In **Chaotic Mode**, it is common that you will hear a slight clicking noise as this is the sound of the speakers turning on and off. For this reason, we suggest using Chaotic as a last resort if you're not succeeding in the Full Power Mode.

④ Night Light

This switch turns the night light On and Off.

⑤ Test Button

Pressing the test button allows you to hear the way the Advanced Ultrasonic Rodent Repelling System emit sound at an audible level. **CAUTION: To prevent hearing loss do not use Test Button for long periods of time.**

⑥ Night Light

This is the location of the Night Light.

⑦ Speaker Indicator Lights

Red Light: Flashes continuously when operating / plugged in.

Green Lights: These lights represent the left and right speaker. When **Rodent Power** is set on **Full Power**, both green lights will be on at all times. When **Rodent Power** is set on **Chaotic**, The green lights will alternate turning on and off to indicate which speaker is currently in operation.

Advanced Ultrasonic Rodent Repeller Instructions

1) Setting Rodent Targeting

First thing you should do is set the **Rodent Targeting** switch to **Stage 1**. Use this setting for 6 weeks, if results aren't meet by then change to **Stage 2**.

2) Setting Rodent Confusion

Rodentonic 1 We recommend using this setting for the **first week**. After 1 week, check your results: if they're good leave on the Rodentonic 1. If the rodents haven't seemed to react, then switch to Rodentonic 2.

Rodentonic 2 If results were not met on Rodentonic 1 after 1 week, we recommend moving over to **Rodentonic 2**. **Rodentonic 2** is the best setting for rodent pest problems, but following our routine **Maximizes Results!**

3) Setting Rodent Power

Set **Rodent Power** to **Full Power** and use this setting until the pest problem is fully repelled. **Chaotic** is mostly used in areas like garages, barns, and warehouses because of the clicking noise in produces. In some hard rodent repelling cases **Chaotic** can give you a positive result.

4) Electromagnetic & Turbulent Storm Repelling

There is no need to set anything as these features work in tandem with Rodent Targeting, Rodent Confusion and Rodent Power. **Turbulent Storm** is a built in Repelling Technique using the High Intensity Speakers, while the **Electromagnetic** feature uses wiring with-in walls to help **repel rodents found deeper in the walls than the sounds can reach alone.**

Not seeing adequate results at the 16 day mark of repelling, Please let us Help: info@cleanrth.com or 480-255-5113
