

Elite Mice and Rat Electronic Pest Repeller *Proper Coverage Example*

Hello, this is Cleanrth Products, and we are going to give you a quick example regarding proper application of your Elite Mice and Rat Electronic Pest Repeller below. In this first layout you're looking at a 2 bedroom home where the main rodent issue is in the kitchen area.

Minimal Mouse/Rat Problem in kitchen area.

Now since this is only a **Minimal Problem**, 1 Elite placed within the kitchen should **dominate this area!**

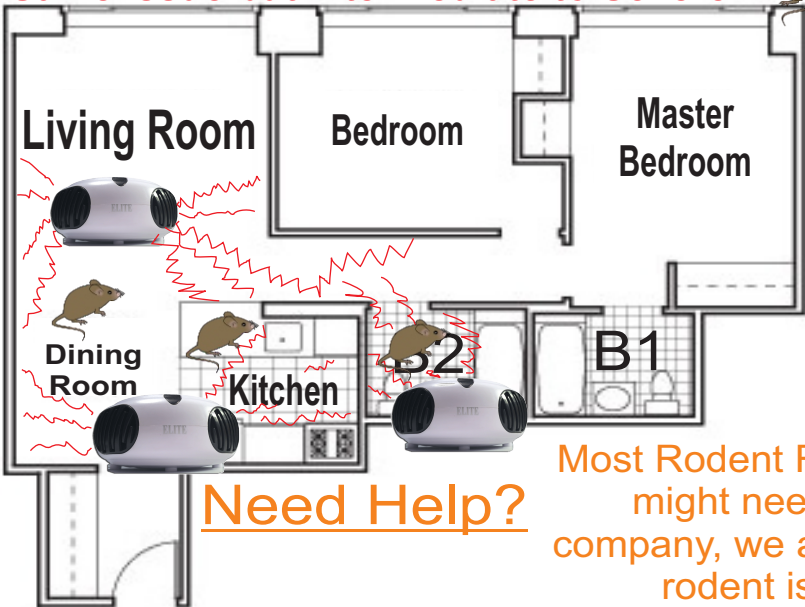

If for any reason you're problem still persists after the two-week mark, it's time to bring in more power.

In other words, you need to repel them from every angle / both sides of the wall to create more of a surround-sound effect for best repelling.

Take a look below to get a better idea of surround-sound coverage!

In this example, we're looking at the same layout and problem area, but this issue is much **more severe**. The way you can tell when you have a severe problem is

Same Issue but Intermediate to Severe.

when the mice or rats have not yet moved out after about two weeks worth of repelling. The best way to cover this would be to cover the kitchen and the surrounding rooms around the kitchen. This way gives maximum repelling-results on both sides of the wall and basically anywhere else the rodents may hide.

Most Rodent Repelling Issues are different, so you might need a little extra help from us. As a company, we are here to help you solve your tough rodent issues. **We are on your side! :)**

Need Help?

If your problem still persists after the 16-20 day mark, please Contact Us as we will move to a **Stage 2** worth of Help

If Ordered Online, please Contact Us via the website you used.
