AIR
Ionic Air Purifier
&
Ozone Air Cleaner

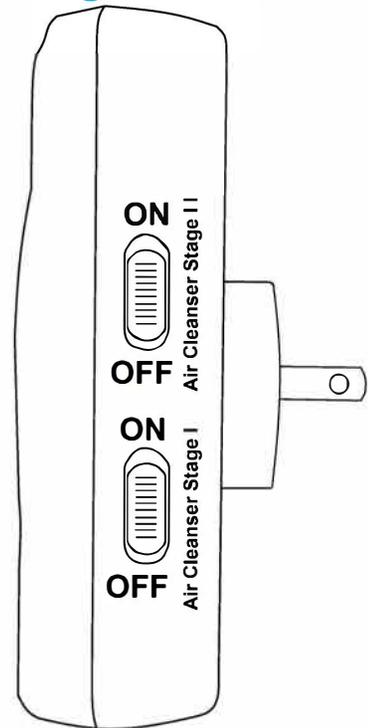

QUICK GUIDE

Left Side

Right Side

Step 1 Remove the Cleanrth Air from its box & select your options using the On/Off switches.

Step 2 On the **Right Side**, you have your Air Cleanser Stage I and Air Cleanser Stage II on/off switches.

Air Cleanser Stage I removes airborne pollutants and purifies the air in a 500 sq. ft. area by generating Negative Ions. The **orange light** will stay on continuously when this Switch is operating.

Air Cleanser Stage II removes smells and cleanses the air in a 500 sq. ft. area by generating safe, small amounts of Ozone. The **blue light** will stay on continuously this Switch is operating.

Step 3 Turn on both **Air Cleanser Stage I** and **Air Cleanser Stage II** and plug the Air device into an outlet nearest the problem.

For best air freshening and cleaning results, put your Cleanrth Air in an outlet that faces the most *open, uncovered area of the room.*

Note: On the **Left Side** of the Cleanrth Air are two optional switches that help reduce pests: **Pest Deterrent** deters pests by emitting ultrasonic sounds that covers 5,000 sq. ft. of open, unobstructed area. The **green light** will blink on and off when this mode is operating. **Internal Pest Deterrent** sends a pest-detering electromagnetic pulse through the existing wiring in your home or business. This technology will not affect humans, pets or electronics and doesn't increase your wiring's own electromagnetic energy. The **red light** will blink on and off when this mode is operating.
