3. By Phone: Local 1-480-255-5113 or Toll Free 1-855-707-7075

Specifications:

Model: TSAR520 Weight: 8 ounces
 Dimensions: H-7” (No Spike) H-15” (With Spike) W-3.75” L-3.5”
 Power: 9V/500mA adaptor, or 2 x 9V batteries
 Power Consumption: 1.5watts
 Infrared Sensor: USA PerkinElmer
 Infrared Area: Oval, 120 degrees, up to 52 ft radius approximately 2,000 sq. ft.
 Ultrasonic Repelling Coverage: 5000 sq. ft. Oval, 120 degrees

EPA Est. No. 085464-CHN-001

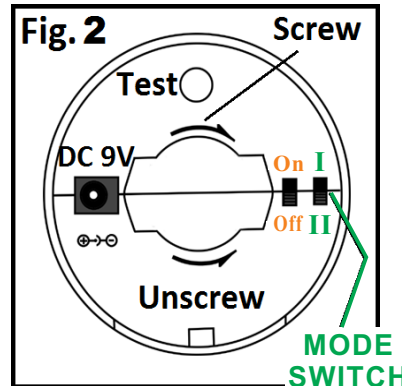

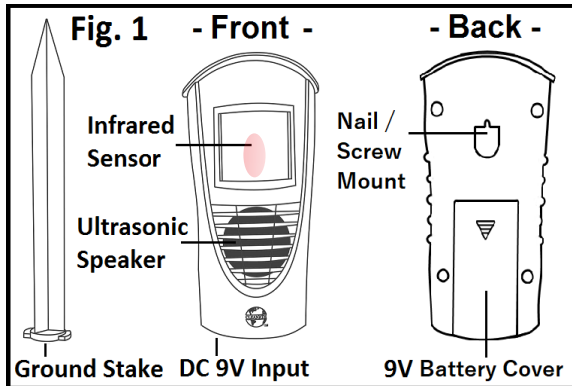

QUICK - GUIDE

We care about your results!

QUICK GUIDE

Running the Animal Repelling Routine & What To Expect

- 1) Once set up and repelling **please allow 8 days** worth of repelling in one spot.
- 2) Use the 8th day as a **check point**. Do you still see animal activity on this day? Has the issue diminished at all? If the problem has improved, Great, please continue to use the device in its current settings.
- 3) If the animal problem **still heavily exists**, Please **Switch** from **Mode II** to **Mode I**. Additionally, feel free to reposition the device to a better location, if needed. **Change in repelling is Key to Animal Repelling Success!** After making these changes, please **allow another 8 days** of repelling.
- 4) **At this point** you should be **16 Days** in worth of repelling. **Has the issue diminished? If not!** Then its time for us to help. **Please Contact Us** and we will **move** to what we like to call our **Stage II** worth of help: **Free of Charge**.

Step 1 Remove the power adaptor from its box and insert the plug end into the 9V DC Input jack located on the back of the unit. Plug the other end in a standard US 120V electrical outlet. You can also power the TSAR520 by installing two 9 Volt batteries (Fig. 1 -Back-)

Step 2 Select Animal Repelling Mode: **Mode II** (Down Position) (Fig. 2)

Step 3 Choose a nearby spot to set your TSAR520 that directly faces the area you want animal free. You have mounting features of hanging the device on the wall or tree (Fig.1 -Back-Nail Screw Mount) or stake into the ground (**please keep Infrared Sensor 7 inches above ground or higher for best performance**).

Step 4 Now simply switch the TSAR520 to **ON** (Fig.2 On/Off Switch)

ATTENTION

TEST BUTTON This allows you to hear the TSAR520 at an Audible Level Indicating that the device is not broken.

When the **Test Button is On** and you're hearing a soft Buzzing Sound: this device is **Not Repelling**. Please make sure the Test Button is Turned Off.

-**Test Button** Sticking **Out** = **Off** = **No Loud Noises** = **Repelling**
 -**Test Button** Pressed **In** = **On** = **Soft Buzzing** = **Not Repelling**

Helpful Hints:

-The **idea** is to give the TSAR520 the best angle for **Detection** so it can **Activate** when an Animal Intruder enter the area. You might find yourself having to make a few adjustments to get it in the perfect spot.

-**Repelling animals is all about Scaring, Startling or even just making the animal intruders Uncomfortable. Change in Repelling Power, Volume, or Angles can be Key for Tough Issues.**

Please Allow us to Help if you do run into a tough issue!

If your Animal Problem still persists after the 16-20 day mark. Please Contact us as we will Move to a **Stage 2** worth of Help/Repelling

WE HAVE SOLUTIONS FOR TOUGH ISSUES :)

If Ordered Online, it's "BEST" to Contact Us via the website you ordered from (e.g., Amazon, Walmart, Sears, etc.) or E-mail: info@clearrth.com or Phone: 480-255-5113
