## How to Use Worm Castings

**Seedlings:** Mix 1:4 ratio of worm castings into your potting mix.

**Vegetables and Annuals:** Side dress with ½ cup of worm castings per plant as needed.

**Transplants:** Sprinkle 1 inch of worm castings in planting hole before placing plant.

**Potted Plants:** Scratch 1 inch of worm castings into the topsoil around base of plant as needed.

**Trees and Shrubs:** Scratch 1 inch of worm castings into soil around base of plant monthly during growing season.
