

**Better** for the  
workplace, better  
**for the planet.**

*"We are working hard to make our products 100% recycled and 100% recyclable with improved design and functionality"*

**Our new selection of greener choice products showcases how we, as a company, are leading the first aid industry towards a more sustainable future.**

Together, we can begin to make a difference to our climate and environment by sourcing and stocking first aid products made from high percentages of recycled and recyclable materials.

-  Less virgin plastic
-  Less label printing
-  Focus on sustainability
-  Reducing our carbon footprint.
-  Investing in greener product development.

Think outside  
the box.

aura<sup>3</sup>

**Not all our boxes are green.**

Some are red, blue, orange and yellow...

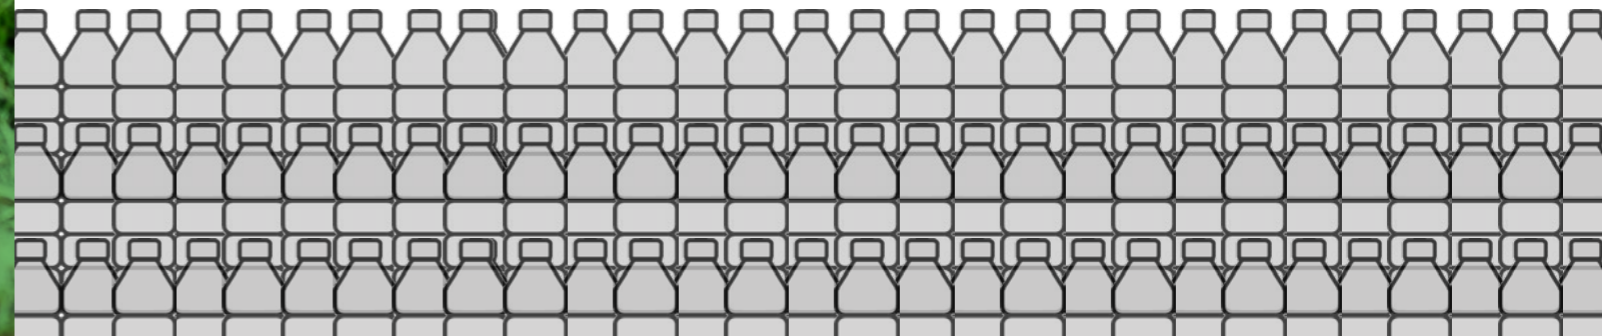

***The latest evolution of our industry leading box.***

*Now made with 100% recycled and recyclable plastic, Aura3 will save an equivalent of 3.43 million plastic bottles each year\*.*

***This could cover the pitch at Wembley twice...***

\*based on equivalent weight.

# Less is more.

Our revised compact sizes mean more product can be shipped in a single container, drastically reducing our carbon footprint.

-  Excess plastic removed
-  Less virgin plastic
-  Fewer labels

### Reducing fresh air.

Where possible, we are committed to shipping fewer empty boxes in our containers.

70%  
smaller

*Based on the previous version size: 27cmH x 37.5cmW x 5cmD  
and new size: 15.8cmH x 19cmW x 5.9cmD.*

50% smaller

*Based on the previous version size: 35.8cmH x 51.3cmW x 11.8cmD and new size:  
25.6cmH x 38.5cmW x 18cmD.*

50% smaller

*Based on the previous version size: 24.5cmH x 33cmW x 2.5cmD and new size:  
12.9cmH x 19.2cmW x 3.3cmD.*

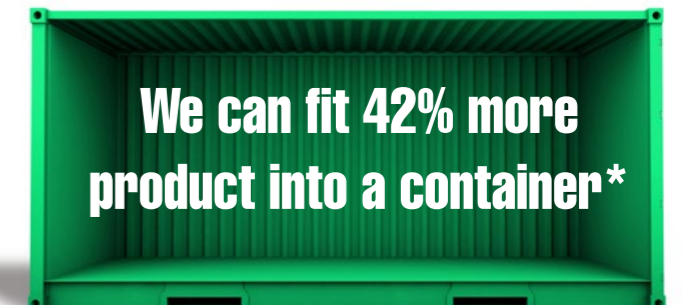

The **future** is  
brighter, greener  
and more compact.

New compact sizes mean more product can be shipped in a single container, drastically reducing our carbon footprint.

By reducing the size of our products, not only are we saving on materials, we are saving on shipping space.

For example our Vision™ wall stations have been redeveloped with this in mind and as a result we can fit 42% more product into a container.

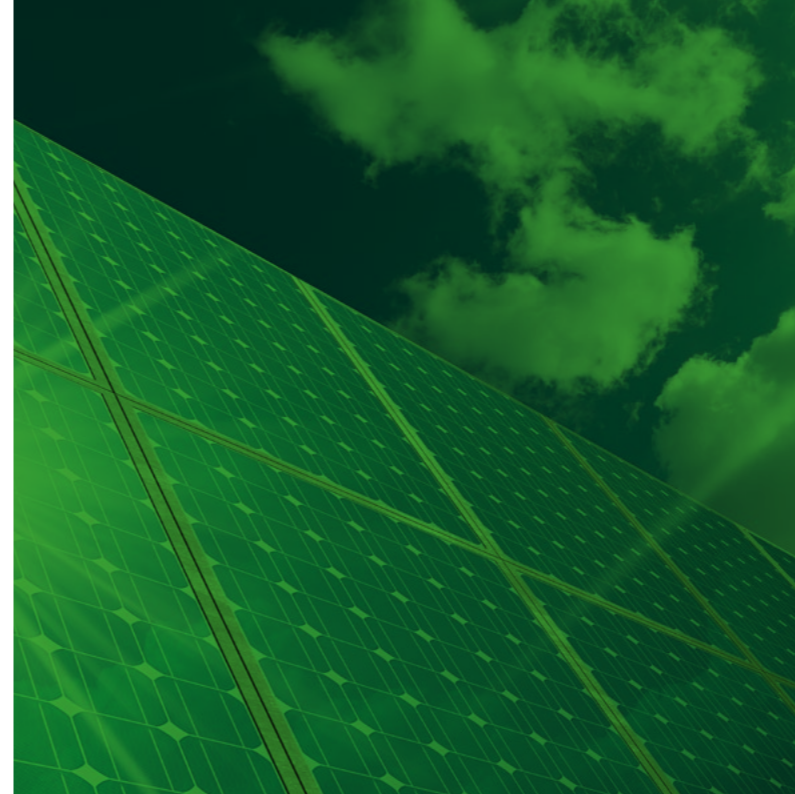

*\*based on the new Vision™ Wall Station*

# Our commitment to change.

## GREEN TEAM

A team of Reliance Medical volunteers that are passionate about improving our green credentials. The team presents ideas back to the board on improvements. The team has already removed single use plastic bottles from the business and replaced them with refillable water bottles topped up from large dispensers.

## SOLAR POWER

The roof of our warehouse holds a 15kw solar farm powering the business infrastructure and vehicle fleet.

## ELECTRIC VEHICLES

Reliance Medical will not put any new combustion engine vehicles into their fleet. Over 60% of the fleet is already fully electric and the remaining cars will transition over the next 12 months.

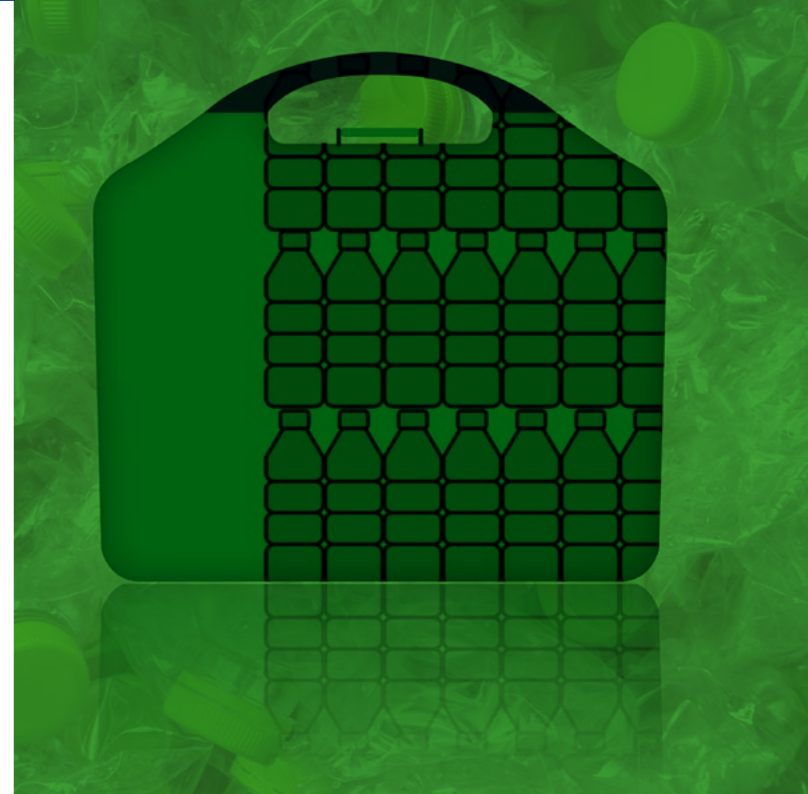

## SAVING PLASTIC

100% of an **aura<sup>3</sup>** box is made from recycled plastic.

**THAT'S 3.43 MILLION BOTTLES OVER 1 YEAR\***

*\*equivalent plastic weight.*

**Better** for the workplace, better **for the planet.**
