How to Use the Activity Booklet

1. Print the booklet double sided.

2. If you print on A4 paper you will get two A5 booklets. You can also choose in your printer settings to print on A3 paper which will give you two A4 booklets if you are wanting something larger.

3. Once you’ve printed out the pages, cut along the solid black line. Don’t forget to cut around the tab for easy access to each story’s activities. The tab numbers refer to the story endings. DON’T cut off the faint gap along the side of each activity. This is used to staple the booklet together.

4. Use the scenario guide to keep track of which story lines you have read with your students. There are 8 possible story lines that lead to 8 different endings.

5. Before reading, answer the questions on page 1 (refer to the page number marked at the bottom of each page).

6. Pages 2–4 & 21 can be used as extra or early finisher activities.

7. The questions in the booklet have been designed to be answered after finishing a story line, that way you know which ending number to go to in the booklet.

8. It is up to you whether the students complete the activities independently or guided by the teacher.
