

# Carrier

BY MIMS SAFE

## Can handle forces up to 26g

For you and your fellow road users' safety, we have set a completely new crash standard. We have tested our roof box at a speed of 50 km/h at a crash pulse in accordance with the ECE R17 standard. The test showed that the roof box can withstand a force of up to 26g.

World's safest  
roof box system

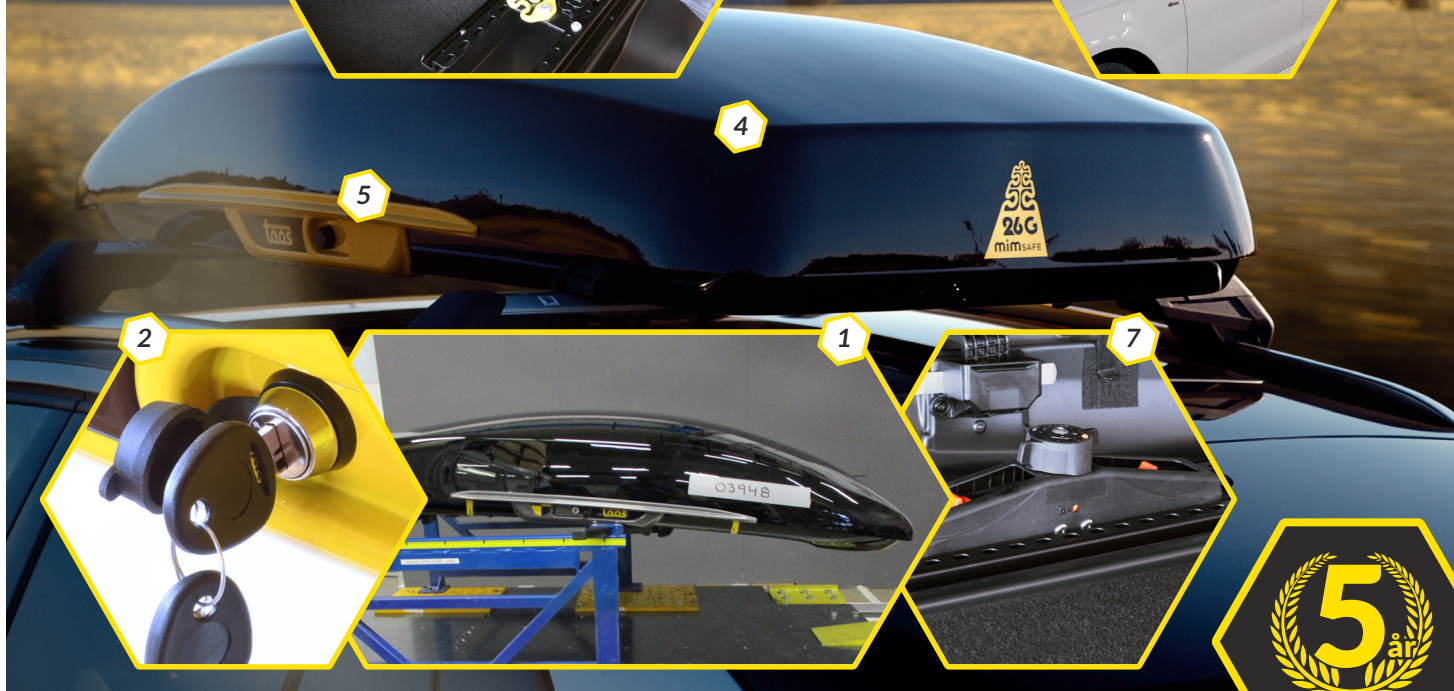

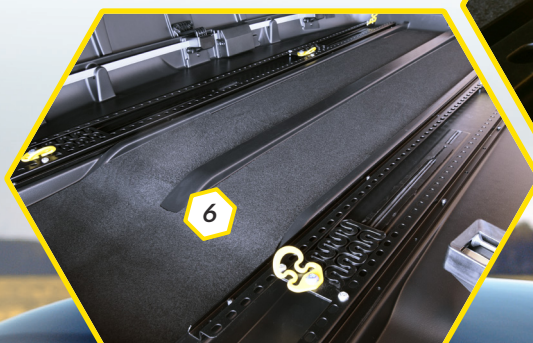

## MIMsafes luggage box – the only one of its kind!

We always put safety first and also hope you will like the design of our latest safety aid. We are known around the world for our crash-tested dog cages and now we are also setting a new crash safety standard for roof boxes.

### 1 CRASH TESTED AT 26 G

Carrier can hold up in a frontal collision with loads of 75 kg at 50 km/h.

### 2 LOCKABLE

You can leave your vehicle unattended knowing that the luggage is securely stowed.

### 3 INTERIOR LIGHTING

Equipped with motion sensor lights for easy packing even in the dark.

### 4 ROBUST

Both the ceilings and floors are double walled for increased stability.

### 5 DUAL OPENING

Both for your own safety and to facilitate packing, the Carrier can be opened from both sides.

### 6 NON-SLIP PROTECTION

The durable and washable carpet keeps the luggage in place.

### 7 QUICK FASTENING

Carrier is easily fastened to the roof rack thanks to its "Quick Grip" function.

### 8 CLIMATE TESTED

Carrier has passed rigorous climatic wind tunnel tests.

### 9 LOAD LOOPS

For maximum securing of the load in the roof box, it is equipped with the TEAS system's load loops.
