

## Crosscut Faudet-Harrison

An ingeniously minimal design made from a single piece of laser-cut rectangular steel and three, five or seven cylindrical oak hooks. The hooks fit neatly into cross cuts in the steel, creating a design that sits flush on the wall with upward facing hooks. The mirror features a circular mirror held in place by friction and secured with two rubber pads which can be connected to the coat hooks. A refined and cleverly conceived design, this is an unobtrusive piece for domestic and commercial settings. Available in grey, white or rust powder coated finish.

Made in the EU and Lancashire, England.
