

Galvanized Peter Marigold

A collection of designs made from laser-cut hot dip galvanised steel. Large, at an industrial kind of scale, they are constructed with oversized nuts and bolts. Each shelf has been hand finished by Marigold, utilising hydrochloric acid to strip back some of the zinc, creating a mottled finish, almost like camouflage.

Made in the UK.

Galvanized Peter Marigold

- 1 High shelving unit
- 2 Coffee table
- 3 Low shelving unit
- 4 Side table
