

Peggy table system Workbench PearsonLloyd

Peggy is a table system created for the modern workplace or home. Appropriate for working, meeting, eating or socialising. It is a reassuringly durable design, made in solid wood using advanced manufacturing techniques.

The workbench is the ideal piece for multi-use spaces, where it can work effectively as a workstation, canteen table, meeting or boardroom table, or as the central hub of a modern workplace. Deeper than other versions, it is available in standard and bespoke sizes.

Also available in bespoke sizes, stains and finishes.
