Donna Wilson

This collection finds new expression for Donna Wilson's creative talents. Inspired by both nature and the lightness and fluidity of watercolour painting, these designs have something of the elemental about them.

'I did hundreds of paintings and put them up on the wall, and that was where these new designs for SCP came from. They were a bit more abstract, I was playing with watercolour, line, shape and colour, without a real end purpose for them. Trying to get back the feelings I had when I first started, not worrying about the outcome.' Donna Wilson
