

A free fountain pen cleaning from Your Friends at Colorado Pen

We get an amazing number of fountain pens sent to our offices in Colorado for cleaning. This pleases us beyond description. Almost all of these pens arrive with a detailed note explaining what may be wrong with their pen and why they've regrettably, stopped using them. That helps us immensely.

How it works

First, we disassemble and soak the pen. After usually two days of soaking and rinsing, the nib and feed go into a warm ultrasonic bath of cleaning solution. This loosens the tiny 'crusties' of pigment residue rinsing just won't dislodge. Once it's completely cleaned to like new condition, the pen is reassembled and extensively tested. We ship the pen back with your pen's writing test and any suggestions if needed.

IMPORTANT: We do not repair or replace any parts which may be needed. This is strictly a cleaning service.
