EXPANSION FLOOR COVERS

PRODUCT INFORMATION

SKU	EJC-I
DESCRIPTION	Expansion Floor Plate/Cover
MATERIAL	GALVANISED STEEL
DIMENSIONS	2400 (L) X 297 (W) X 5MM
UNDERLAY	4.5MM FIBRE REINFORCED RUBBER

DESCRIPTION The expansion joint cover plate is produced from 5mm thick galvanised steel and protects the sealed joint from ultraviolet attack and the physical damage caused by vehicle and pedestrian traffic. Does not substitute for water proofing. Checker plate style has smooth slots for uninhibited movement. Expansion joint covers can be installed over existing sealants and are widely used in multi-deck structures, car parks, roofs, ramps, drive ways, etc. Supplied with all fixings and includes rubber underlay to reduce noise.
