Keep leaves, debris and ducks out of your pool, all year-round with DEBRIS DEFENDER

Anyone who has a pool will know how much work is involved in maintaining it. In most cases you spend approximately 8-9 months a year cleaning and vacuuming your pool, only to enjoy 3-4 months use.

Each cover is made with reinforced seams for a smooth finish and rope reinforced hem for strength. Usually easily handled by one person, a Debris Defender cover folds away in its own storage bag when not in use. (Please note, this is not a safety cover.)

Why choose a DEBRIS DEFENDER?

- Keep out leaves, debris and animals
- Stops around 70% of evaporation
- Blocks sunlight and prevents algae growth
- Reduces pool maintenance and cleaning time
- Will reduce chemical consumption by around 50%
- Can reduce electricity consumption
- 525 x 565 Denier micron thickness
- High quality material, made in the USA
- 8 year pro-rata warranty

Save Chemicals

The Debris Defender allows the pool water to breathe, preventing a Chlorine build up in your pool and can be left on the pool for extended periods of time. A normal solar blanket needs to be taken off the pool at regular intervals to allow the chlorine gases to escape. If this is not Chlorine will build up and can bleach the lining of your pool and destroy the blanket.

By preventing the leaves and organic matter from entering your pool, you will significantly reduce the chance of phosphates building up in your pool water, thus reducing the need to purchase phosphate remover.

Save Time on Cleaning

By installing a mesh cover on your pool, you can significantly reduce the amount of cleaning you need to do. Any medium to large pieces of debris, such as leaves and grass that may blow onto your pool, will sit on top of the mesh cover and simply blow right off again. You can keep your pool clean all year round with a pool mesh cover from Elite Pool Covers.

Save Money

By installing a mesh cover, you can save a significant amount of money. Water evaporation means an average pool drains and refills itself 1 and a half times each year. The cost of refilling your pool is not cheap. With a mesh cover, you can lower the amount of evaporation, and save a significant amount of money. Elite Pool Covers proudly offers the best range of pool covers in Perth.

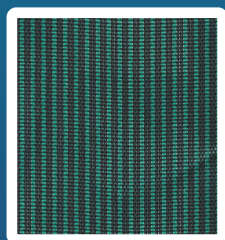

Easy to use

A DEBRIS DEFENDER cover is surprisingly easy to use. Removing the cover is easily done by one person, and takes around 10 minutes for most pools. Once the tension has been taken off the ropes, the whole cover lifts off (with the clips still attached), and there is nothing left protruding on the pool surround. When putting the cover back on, the pins are simply placed back into the holes and the rope tightened and re-locked – no tools required.
