AUTOMATIC POOL COVER SYSTEMS, COMMERCIAL GRADE BLANKET

Elite Automatic Rigid Pool Cover Systems

Elite's top of the range pool cover system will add the finishing touch to your home and pool area. Fully automatic and customised, the rigid cover system will provide the ultimate convenience while saving money on water, heating and chemicals.

\$POA

Elite Thermal Shield Thermal Blanket

Thermal Shield blankets have been designed specifically for heat retention and is ideal when the ambient air temperature drops below the pool water temperature. Thermal Shield's exclusive Airlon foam core has up to 3 times less water absorption than the other foam in other blankets on the market.

\$39.00
p/m 5mm

PLUS INSTALL

Elite's lighter, longer lasting more thermal efficient closed cell AIRLON foam core outperforms other conventional thermal blankets.

ELITE THERMAL SHIELD™

Elite Thermal Shield™ delivers you more savings, a faster return and a much longer life on your pool blanket investment...

Elite Thermal Shield™ has a higher 'R' value than most other blankets (the higher the r value, the more resistance to heat flow, the better your blanket performs), which means your pool will heat up quicker, stay warmer longer and best of all, be less expensive to operate.

Bench Seat Roller Options to suit Thermal Shield™ are available

MEASURING THE INSIDE WALL OF YOUR POOL

THE BEST ADVICE

The best way to tackle measuring your pool is to think of it as a rectangle (i.e. longest length x widest width).

For example Pools 1 through 5 below. If your pool is shaped like Pool Type 6 (with steps or swimouts) the pool should be divided into 2 rectangles as shown and the two measurements added together to give a total square metreage.

"If you are unsure about your measurements, please double check because if we make a cover based on incorrect measurements, we will charge a call out and restocking fee."

TEST RESULTS PROVE ELITE BLANKETS HEAT BETTER, INSULATE BETTER AND LAST LONGER*

The most cost effective method of increasing your summer pool fun by up to 4 months is with free heat from the sun.

With an Elite Solar Blanket - the blanket becomes a giant solar energy collector. The sun's energy absorbs easily through the blanket, heating the water underneath and the trapped heat remains in the pool - where you want it.

Not only does it heat the pool for free, but an Elite Solar Blanket keeps the pool cleaner and saves precious water by stopping evaporation. With an Elite Pool Blanket, you can enjoy a warmer pool for longer, increasing your swimming season considerably!

When considering a blanket for your pool, it makes sense to choose Elite - they heat better, insulate better and last longer.

*Independent scale tank tests and comparative guarded hot plate tests to Australian Standard AS4859-1

Extend your
summer
+ enjoy
your pool
for longer
