

# Steri-clean

## Antibacterial Cleaner

### Presentation

Approved by Health Canada, Steri-clean is an antiseptic cleaner that is safe for the skin and eliminates harmful bacteria and germs.

### Why use Steri-clean ?

- To clean intimate products :

Easy to use and hypoallergenic, Steri-clean is essential since it is important for your sexual health to clean intimate accessories before and after each use. Dust, bacteria or other contaminants may cause problems if they are in contact with female genitals. Thus, such objects must be properly cleaned with Steri-clean, which is designed to remove any elements that may be harmful to female sexual health.

- To clean women's genitals :

Containing no alcohol, Steri-clean is ideal to gently clean female external genitalia, while eliminating bad odors.

\* Important note : Steri-clean must be used externally only, just like soap.

### When to use Steri-clean ?

It is necessary to clean your intimate products before and after each use. As it is easy to use, Steri-clean fits well in your daily routine.

### How to use Steri-clean ?

To properly clean your intimate product, simply spray on it and make sure the entire surface is covered. Wait about a minute, and rinse it under water. If necessary, wipe it with a clean fabric.

### Ingredients :

Medicinal ingredient:  
Chlorhexidine gluconate 2.0%

Non-medicinal ingredients :  
Purified Water, Glycerin, poly (sorbate) 20, phenoxyethanol, (p)-hydroxybenzoate methyl

- Steri-clean does not contain alcohol or silicone so it can be used on all Floravi products as well as all types of materials: silicone, latex, rubber, plastic, glass, etc.
- Cleans quickly and efficiently all types of intimate products.
