

Personal Massagers

Dahlia, Lila & Rose

Presentation

Used for decades, massagers are steadily gaining popularity due to their many benefits for female sexual health. Recommended by many sexologists, massagers allow women to better know their body so that they can achieve a higher level of pleasure.

The massagers allow to :

- Better know the type of stimulation that accentuates your pleasure to maximize your well-being;
- Counter anorgasmia or the difficulty to reach orgasms;
- Overcome some effects of menopause, such as vaginal atrophy;
- Encourage women to practice sexual activity more frequently; allowing the production of substances beneficial to health such as :
 - Endorphins that increase the sensation of pleasure, relaxation and decrease stress;
 - Oxytocin : a hormone beneficial to the breast
 - Lubricating substances that allows the vagina to keep its flexibility.
- Increase the level of excitement and, as a result, have better natural lubrication;
- Increase desire;
- Encourage self-affirmation with your partner.

Dahlia

Lila

Rose

Floravi offers three different personal massagers

Dahlia – Curved massager

Dahlia provides an unique sensation with its soft texture and curved tip designed for a targeted massage! This massager has a length of 165mm and a diameter of 30 mm.

Lila – Short massager

Lila is small and discreet. Its benefits can be seen through its soft texture and linear shape, ideal for internal and external stimulation! Lila has a length of 155mm and a diameter of 25mm.

Rose – Long massager

Longer than Lila, Rose reaches the deeper parts. Providing remarkable pleasure due to its soft texture and linear shape, it is ideal for internal and external stimulation! Rose has a length of 200mm and a diameter of 30mm.

Relevant information

The first 3 modes of all Floravi massagers are constant vibrations, while the other 4 are pulsating modes. It is important to use non-alkaline batteries with Floravi personal massagers. Use them with Floravi water-based lubricant to maximize your enjoyment! Clean them with a special antibacterial agent such as Floravi's Steri-clean.

Characteristics :

- Material : ABS plastic with a satin finish
- Splash proof
- 7 vibrating modes
- Batteries : 1 AA battery (Dahlia), 2 AA batteries (Lila & Rose)
- Average time of use : more than 2 hours

7 vibration modes
