HELLER BELLINI CHAIR

www.helleronline.com

► The Bellini is the designer chair you buy when money *is* an object. Despite its ultrathin sculptural profile, it's practically indestructible. Its legs are hollow, which makes them lightweight and strong (think of pushing down on a paper-towel tube), and the seat back offers just a bit of give, so it's more comfortable than you'd expect. But what makes the Bellini the true Everyman's chair, besides being suitable for the dining room or the backyard, is how easy it is to clean. Because it's made from a single seamless material (with very clean lines), you can literally hose it down. If you have kids, this feature alone will change your life.—M.H.
