028-713215241 Mobile access and working towers
Stabilo / ProTec / ClimTec / Mobilgerüst;

Dear Mr. Steinbrecher,

we hereby confirm that the mobile access and working towers (mobile scaffolds) listed above have been subjected to a safety test in accordance with the following test specifications: EN 1004-1:2020 / EN 1004-2:2022.

Since EN 1004-2:2022 has been published as a white print in March 2022, the requirements for the operating instructions are already taken into account in the test, but this still requires additional time.

A positive test result was achieved in the safety test according to EN 1004-1:2020. You are expected to receive the corresponding certificates and test reports by the end of March 2022.

Kind regards
